AI/BI for Data Analysts

Databricks Academy

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Agenda

Modules in this Course	Time
Dashboards and Visualizations in Databricks	2 hr 15 mins
AI/BI Genie	1 hr 15 mins

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Course Learning Objectives

By the end of this course, you'll be able to use Databricks AI/BI tools to:

- Design dashboards for business insights.
- Share business intelligence assets with collaborators and stakeholders.
- Periodically revise data assets in accordance with best practices and new information.
- Create data assets for self-service analytics.
- Manage data assets for business intelligence in Databricks.

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Lab Exercise Environment

Technical Details

- Your lab environment is provided by Vocareum.
- It will open in a new tab.
- It has been configured with the permissions and resources required to accomplish the tasks outlined in the lab exercise.
- Third party cookies must be enabled in your browser for Vocareum's user experience to work properly.
- Make sure to enable pop ups!

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Before we get started...

Just a quick note

- Be aware, Databricks is a highly innovative company and through our courses we try to give you the latest and greatest.
- If you encounter inconsistencies in product naming, UI environments, or other areas of this content – let us know!
  Visit help.databricks.com to submit your feedback.

Enjoy the course!

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Dashboards and Visualizations in Databricks

AI/BI for Data Analysts

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Agenda

Dashboards and Visualizations in Databricks	Time	Lecture	Demo	Activity
AI/BI Dashboards	15 mins	✓		
Just enough SQL	10 mins	✓		
Designing Datasets for Dashboards	20 mins		✓	
Creating Visualizations and adding Summary Statistics to Dashboards	20 mins		✓	
AI Enhanced Features	8 mins		✓	
Filters	8 mins		✓	
Sharing Dashboards with Stakeholders and Others	8 mins		✓	
Managing Dashboards in Production	8 mins		✓	
Dashboard and Visualization Lab Activity	30 mins			✓

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Learning Objectives (Part 1)

Design dashboards for business insights.

- Create datasets specifically for AI/BI Dashboards.
- Create the visualizations and widgets necessary for displaying the results of summary statistics.
- Use AI to create visualizations and widgets for a dashboard.
- Add dynamic features to a dashboard (parameters, filters).

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Learning Objectives (Part 2)

Securely share data assets created for business intelligence purposes.

- Share business intelligence assets with collaborators and stakeholders.
- Use embedded credentials with a Dashboard to share with account-level Databricks users.
- Subscribe users to dashboards.

Periodically revise data assets in accordance with best practices and new information.

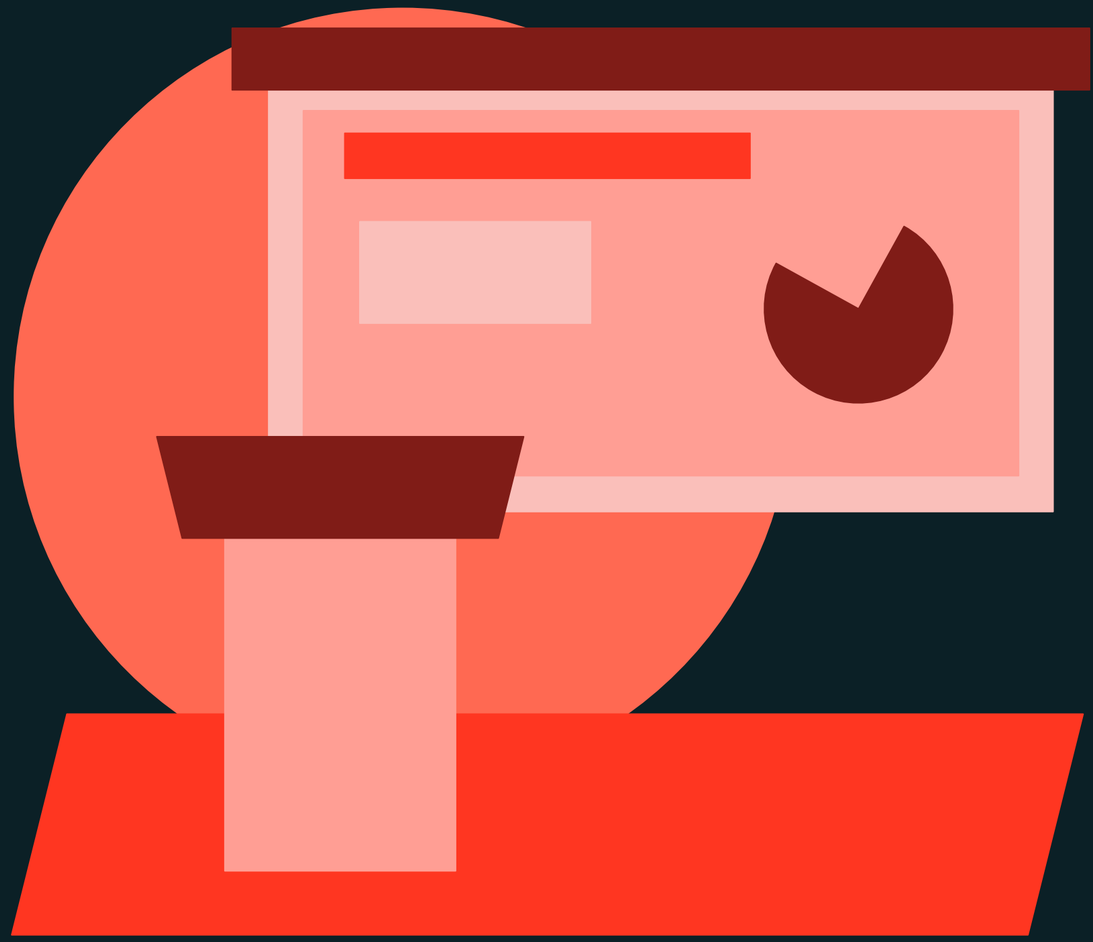
- Set refresh schedules on data assets used for business intelligence.

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Dashboards and Visualizations in Databricks

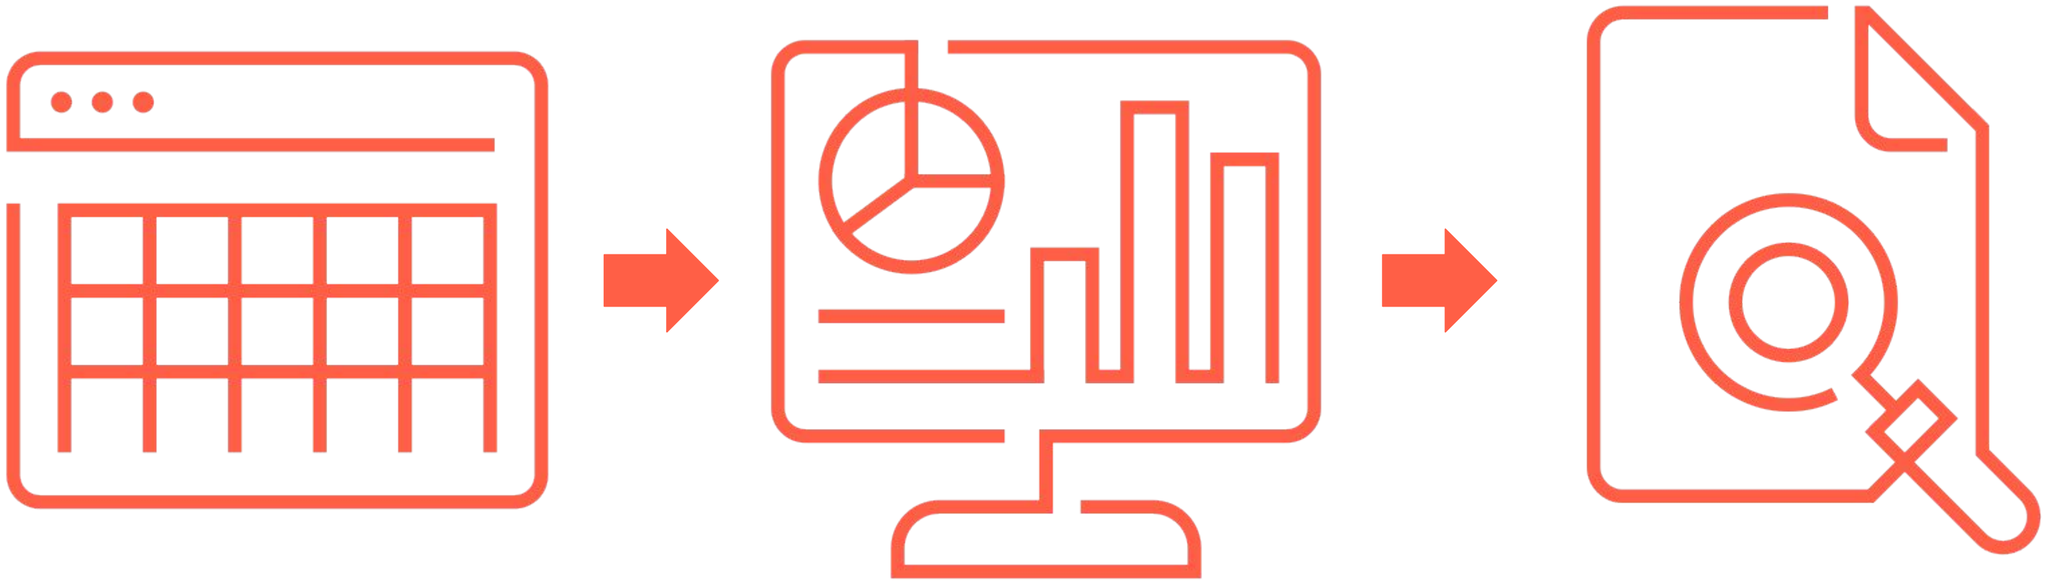
LECTURE

AI/BI Dashboards



© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Dashboards bridge the gap between data and information



Data → *Dashboards* → *Business insights*

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

What is an AI/BI Dashboard?

It is a modern BI interface with AI-assisted authoring and real-time visualizations

It is designed for collaboration and sharing insights with anyone in your organization

It is integrated with AI/BI Genie to allow users to explore data via conversational analytics

Dataset

SQL

Parameters

→

Data

→

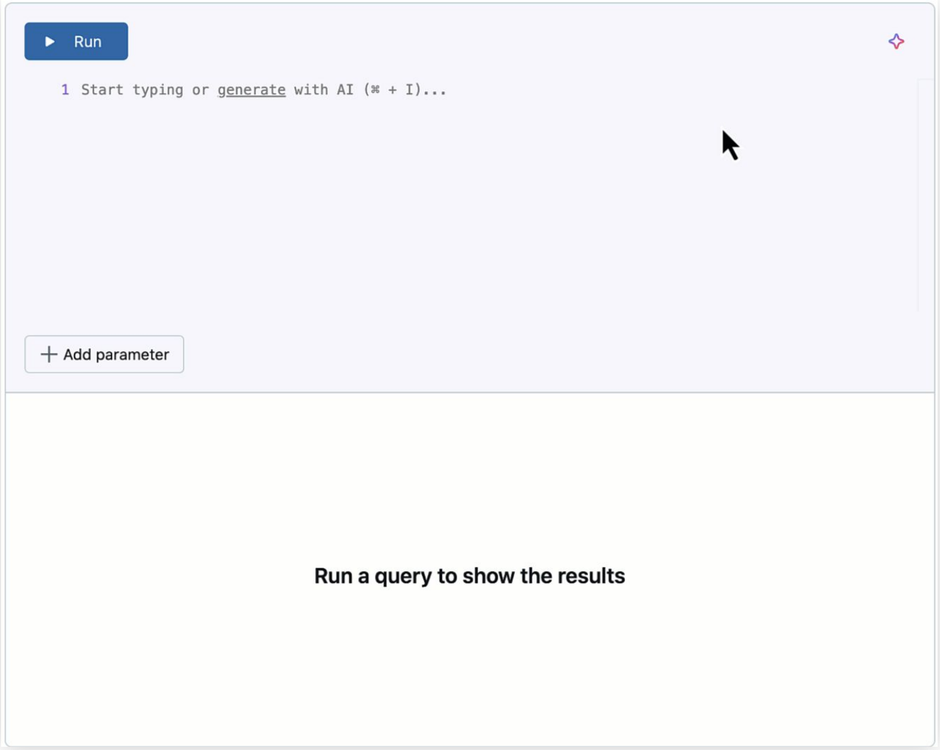
Visualizations

(Charts & Filters)

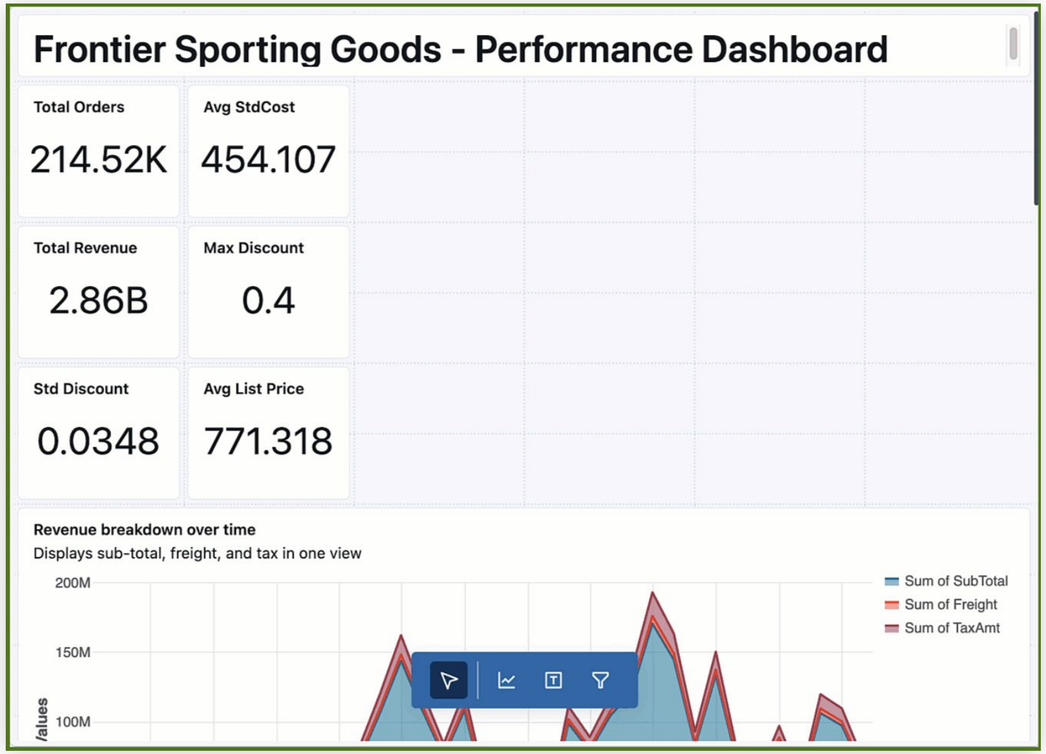
© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Databricks AI/BI Dashboards offer developers AI assistance

With defining data sets



And with making visualizations

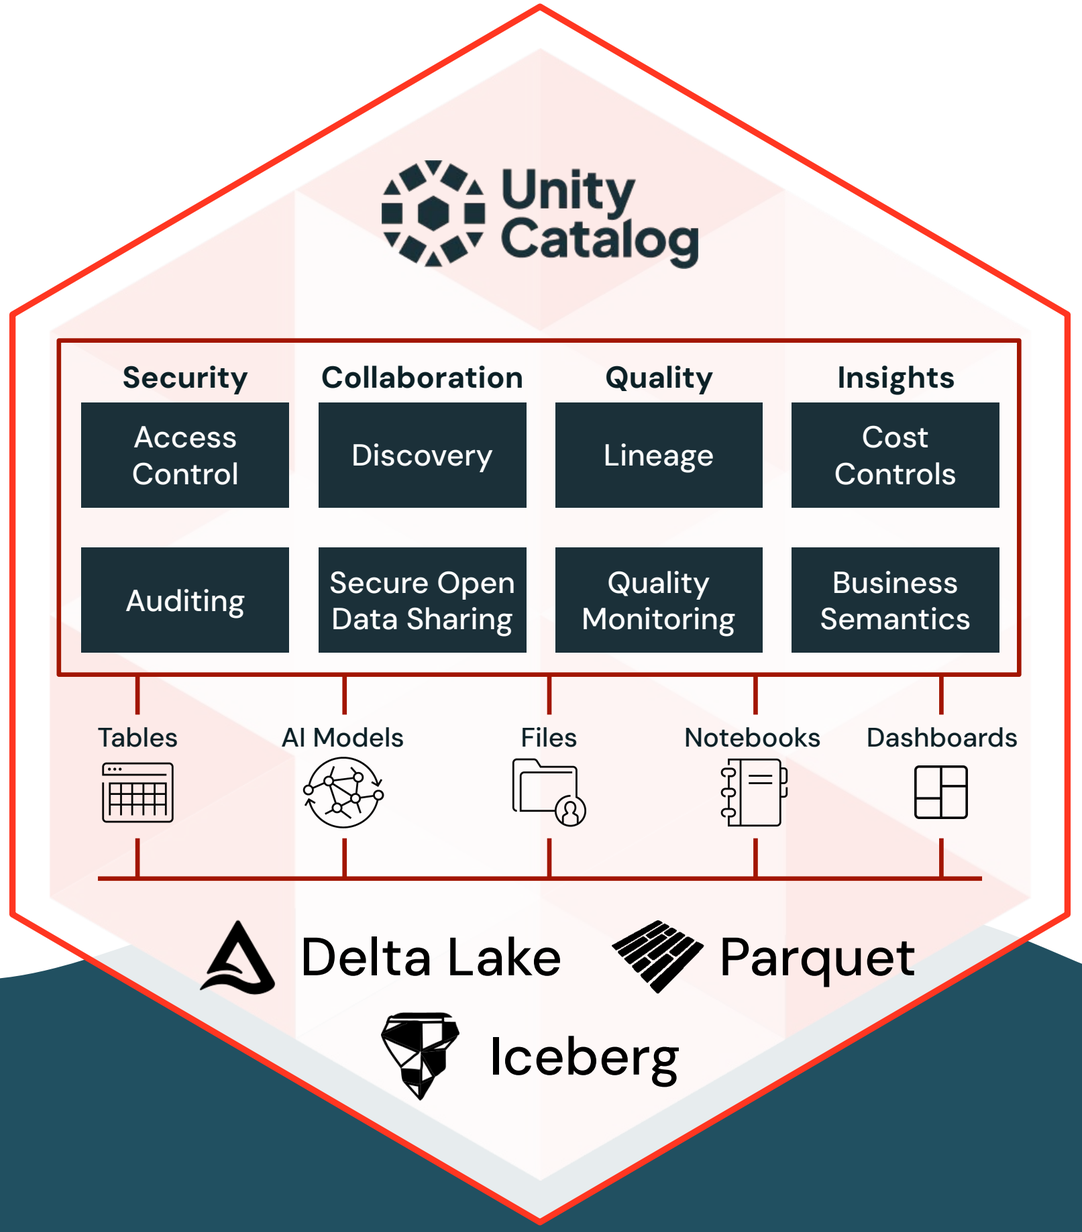


© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

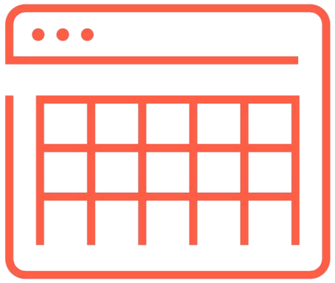
Built on Unity Catalog for unified governance

Unified capabilities for **every use case**

Unified governance for **all assets**



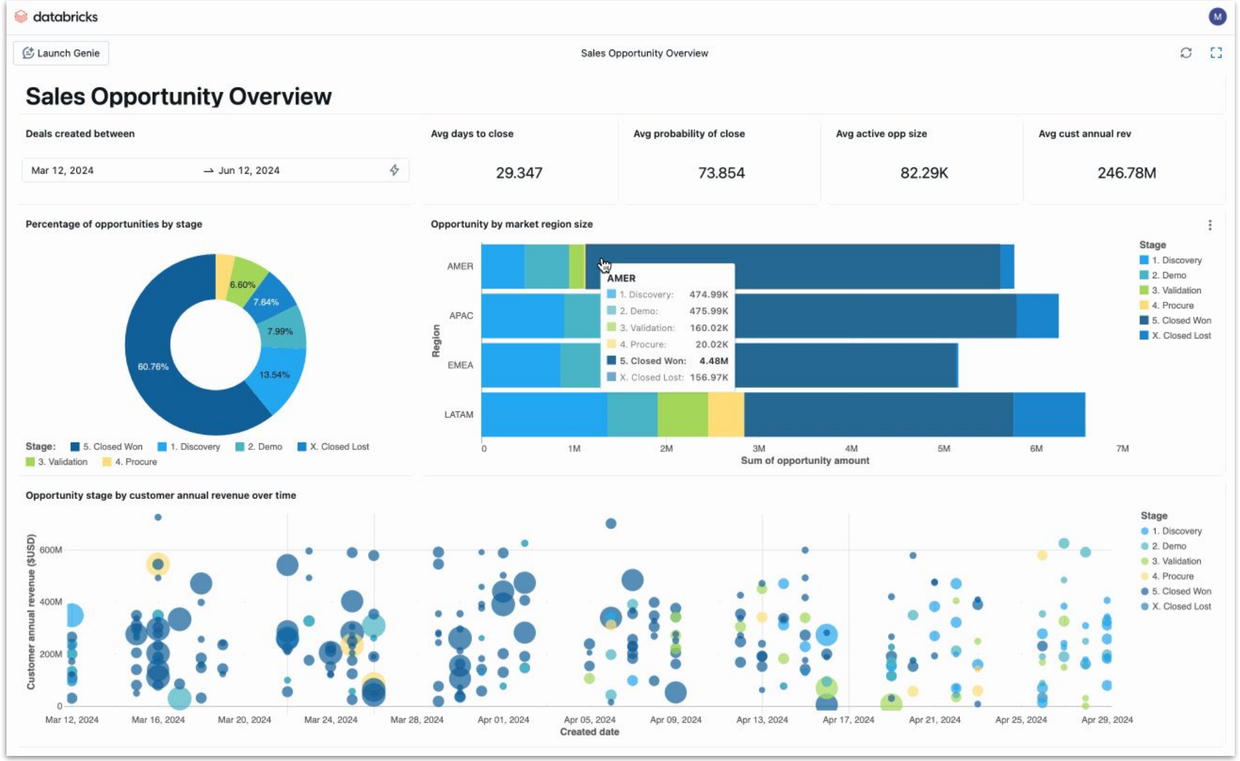
Dashboards offer instant, interactive insights at scale



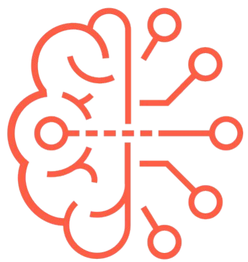
Data

```
SELECT name,
national_id,
        country, fee_paid
FROM fee_transactions
WHERE country IN
        ('US','CA','MX');
```

Queries



Visualization



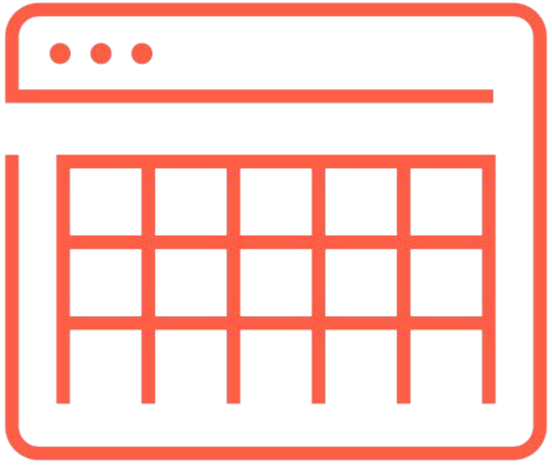
AI

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

What do you need to create a dashboard?

A business purpose

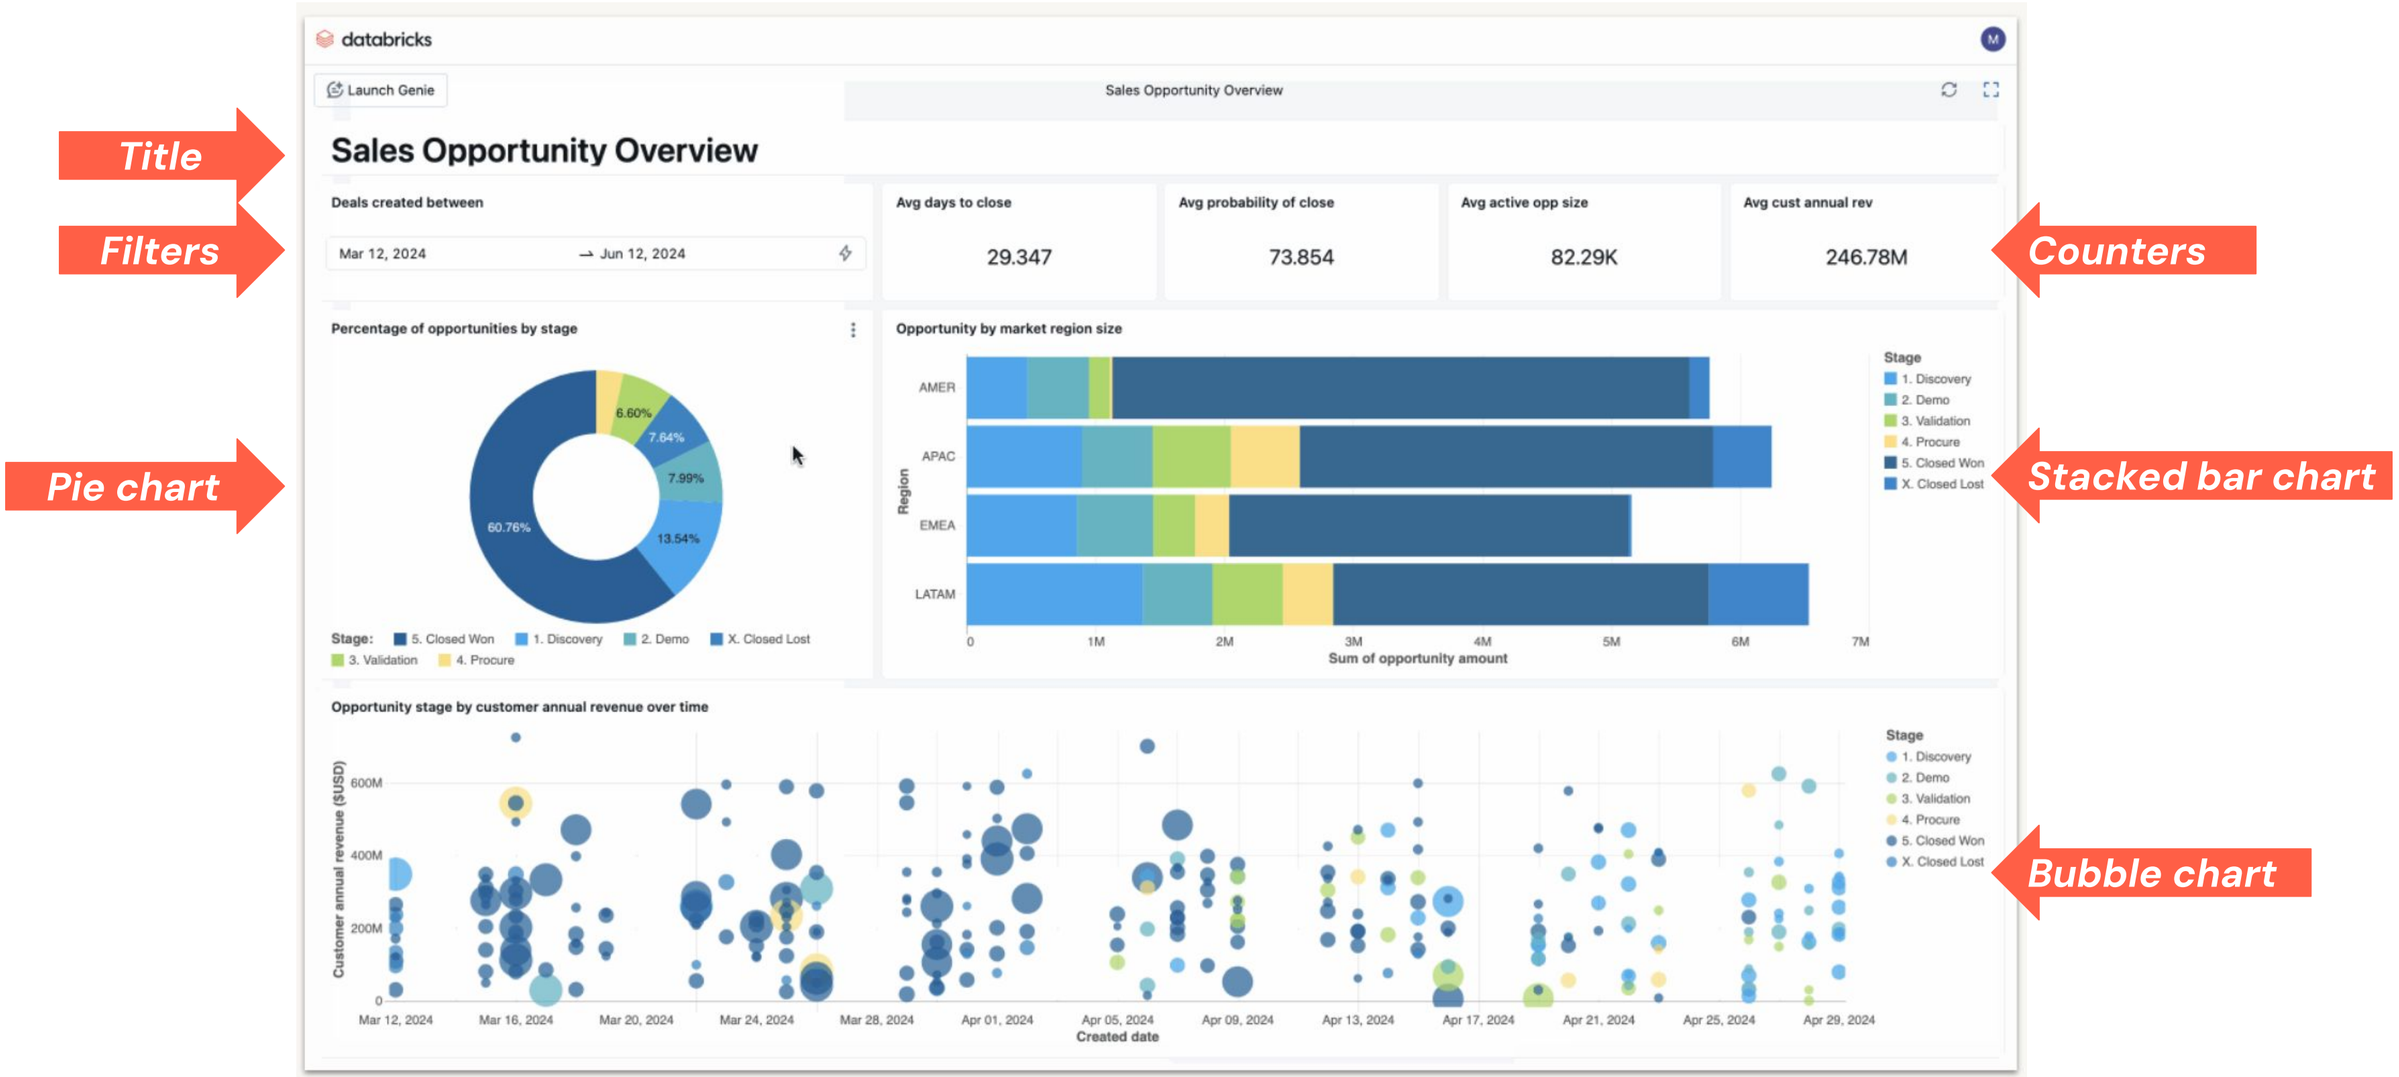
A target audience



Data

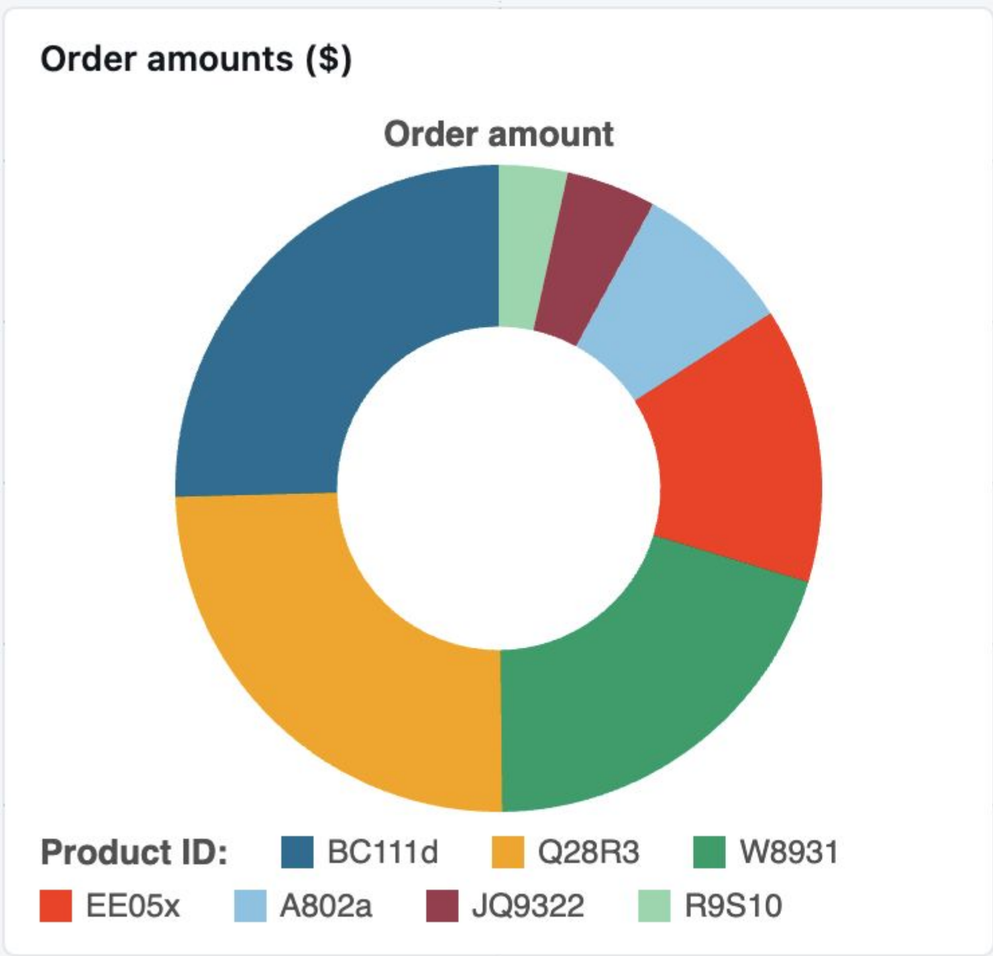
© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

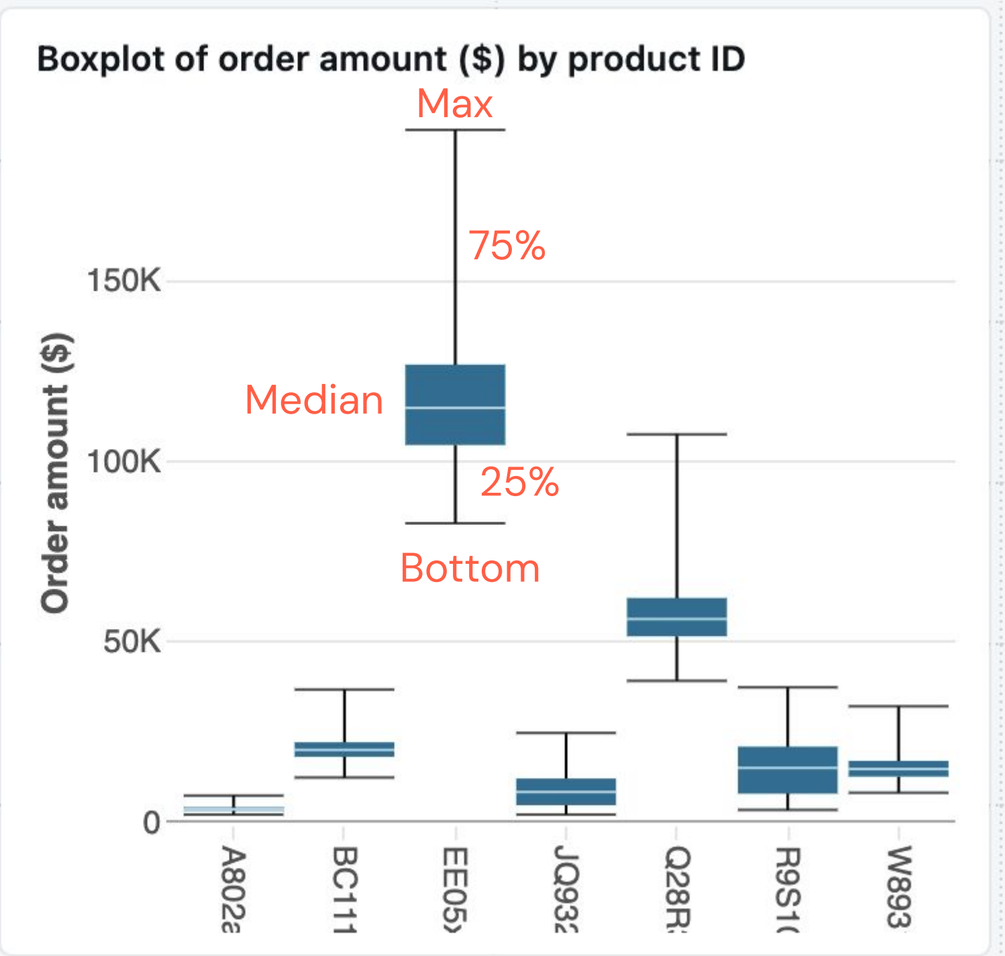
What makes up a dashboard?



© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

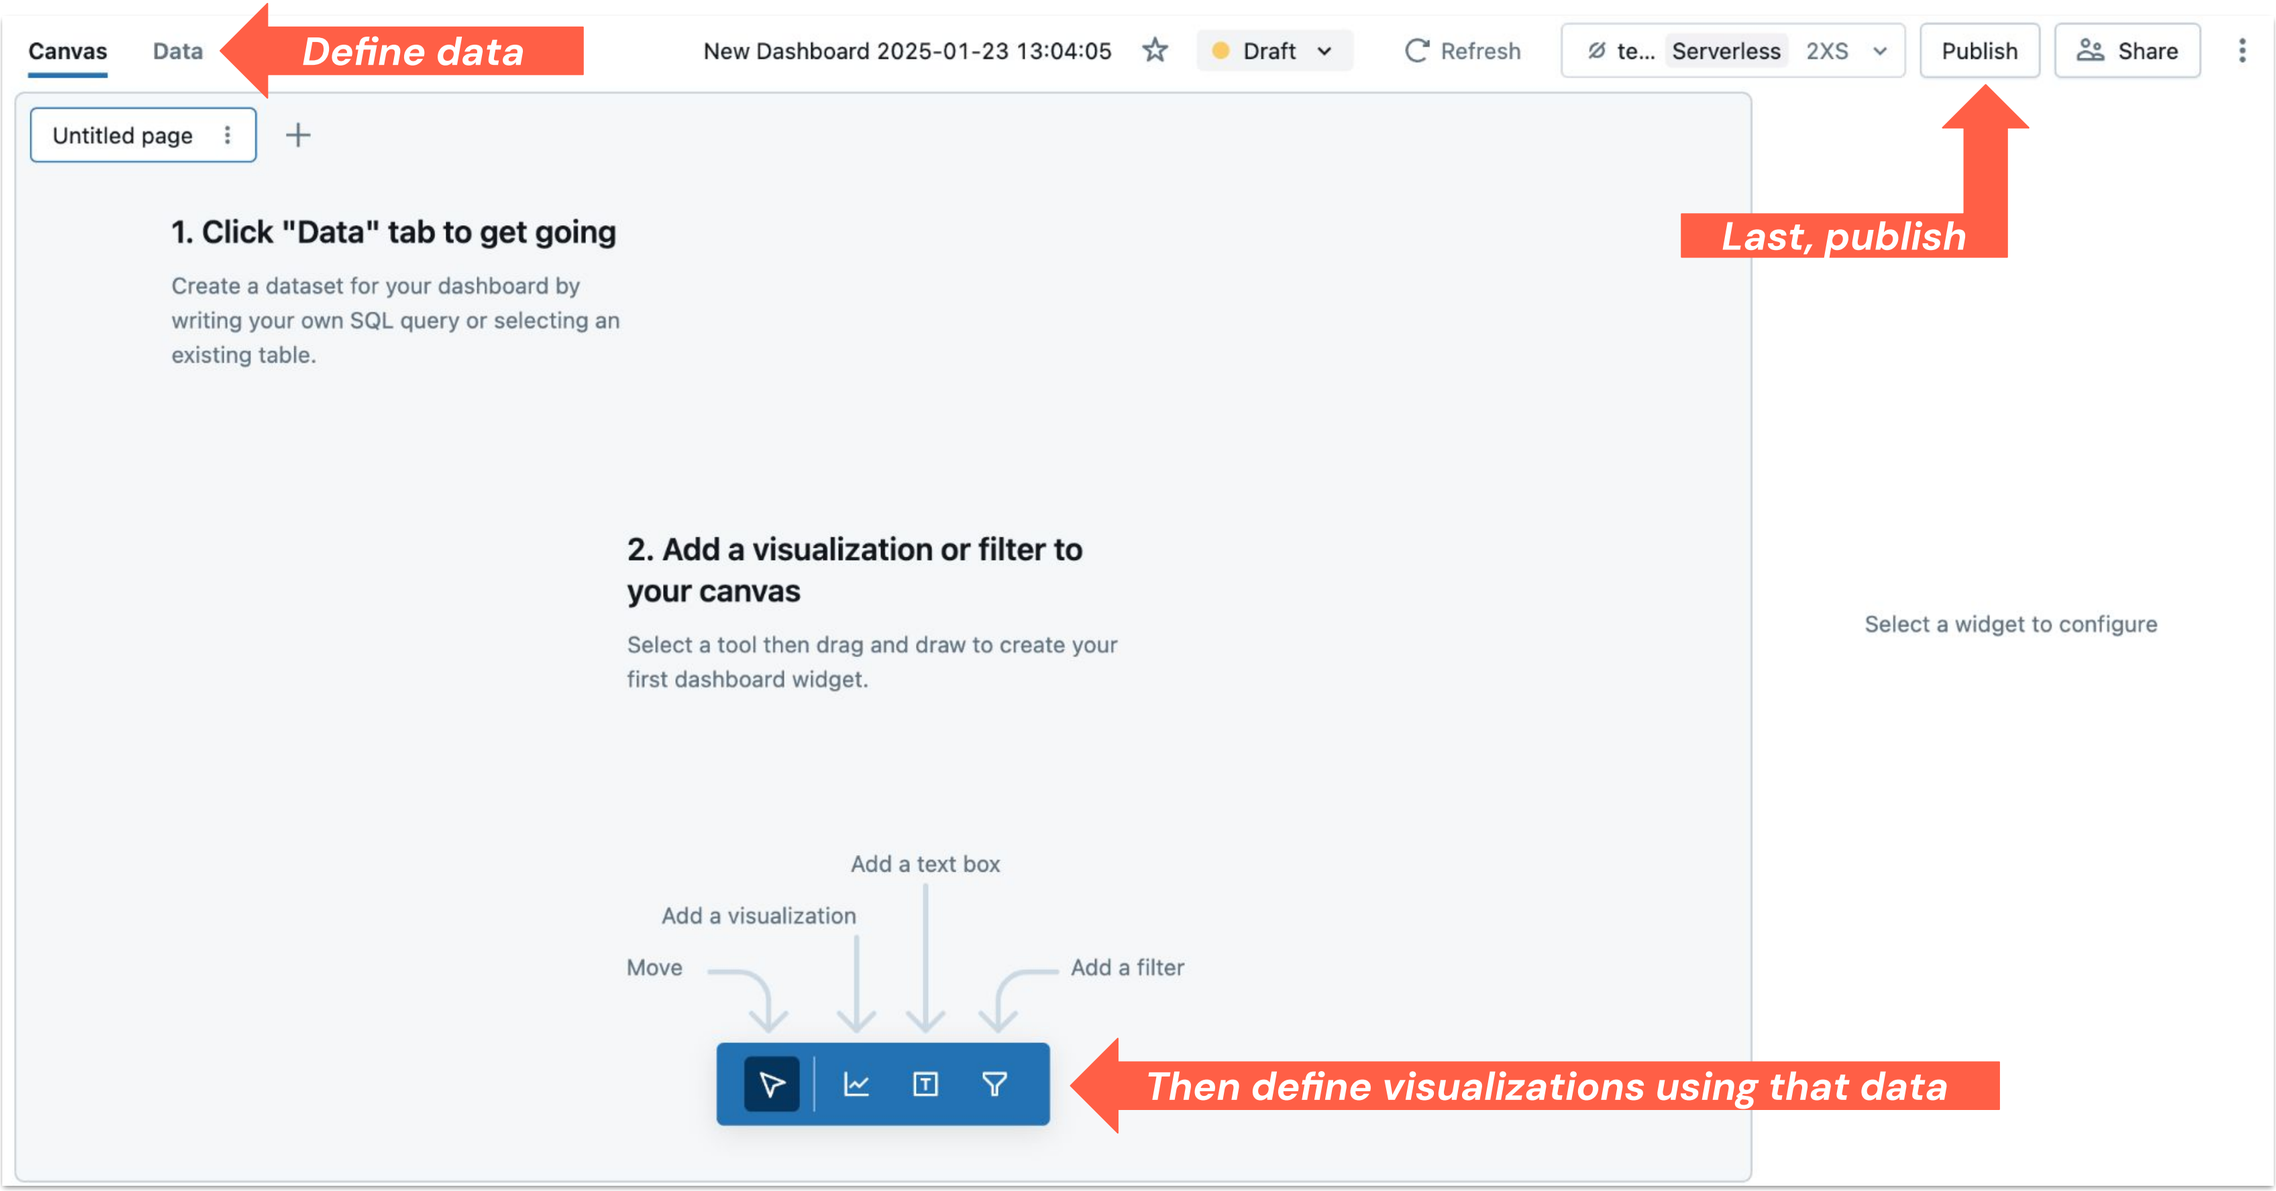
Dashboards can show summary statistics



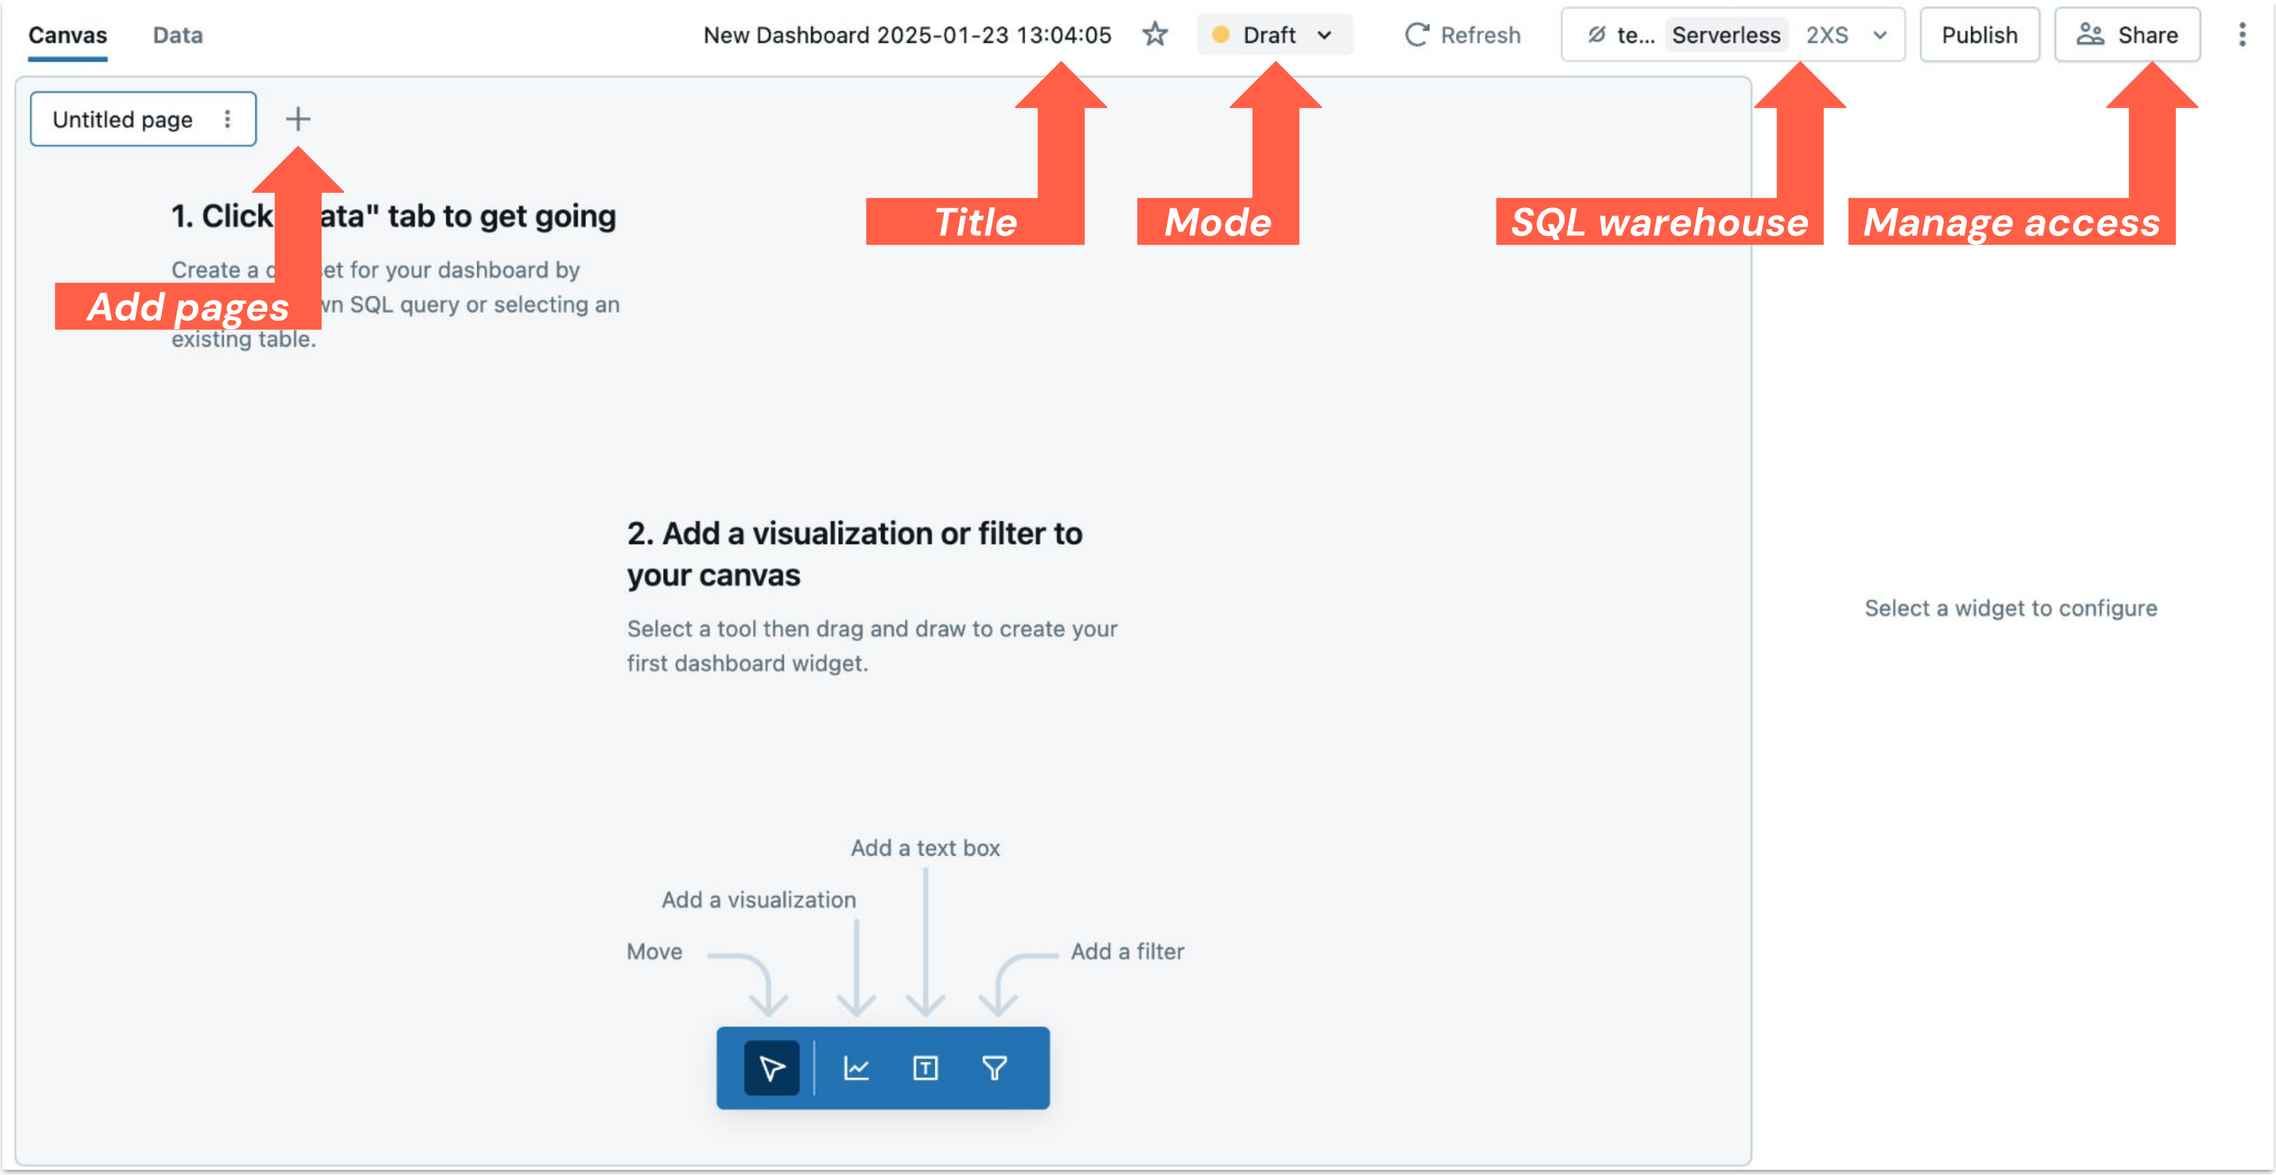


© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

It all starts with Create Dashboard



What options are available in the UI?



Permissions: what can you do with a dashboard?

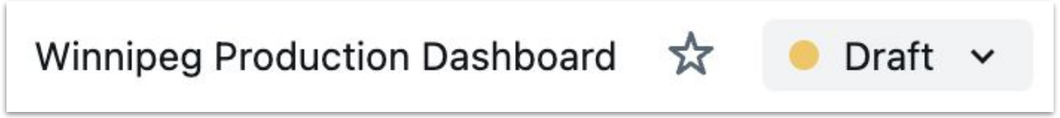
CAN VIEW or **CAN RUN**		✓ Can look at and and refresh the dashboard ✓ Can click on widgets in the dashboard and interact with them ✓ Can clone the dashboard
CAN EDIT		All the above, plus ✓ Can edit the dashboard ✓ Can publish the dashboard
CAN MANAGE		All the above, plus ✓ Can change users' permissions on the dashboard ✓ Can delete the dashboard

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Your dashboard's publication cycle

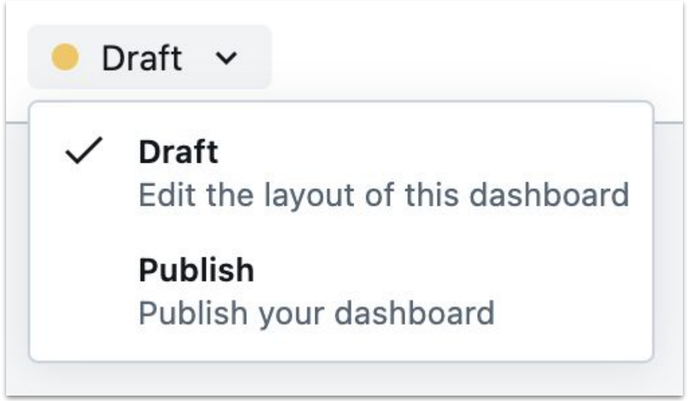
First creation

After naming

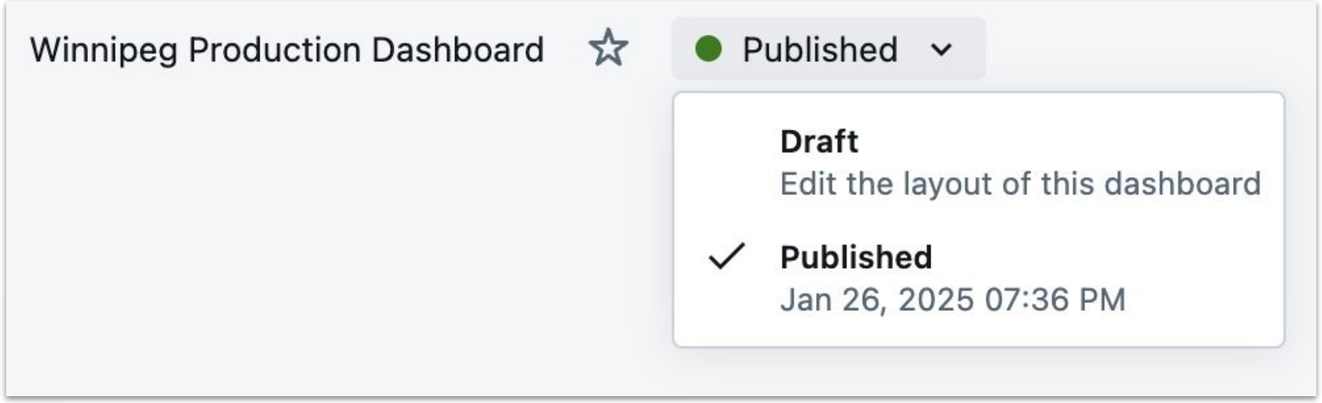


Ready to publish

OR

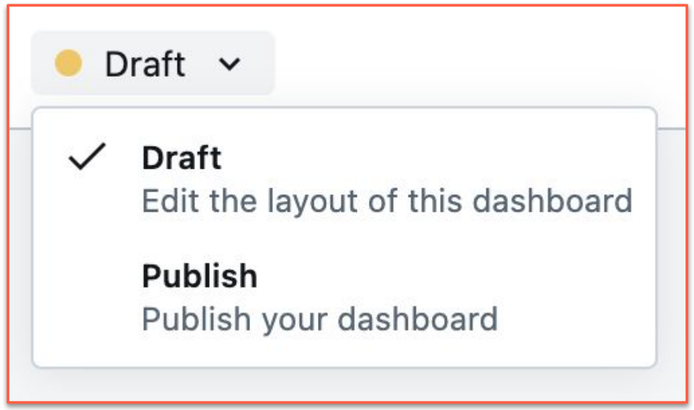


Published

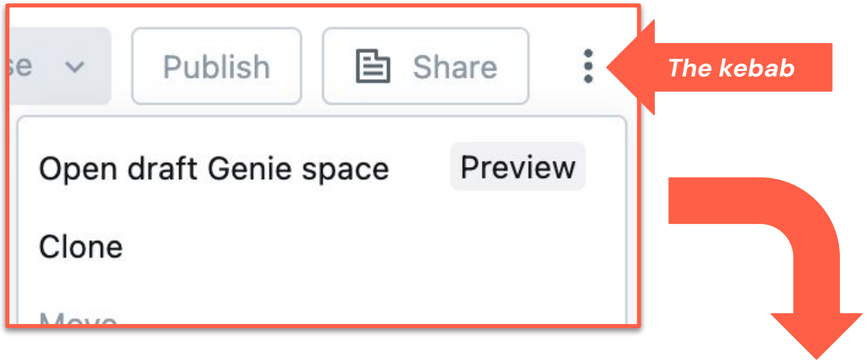


How can you make a copy of an existing dashboard?

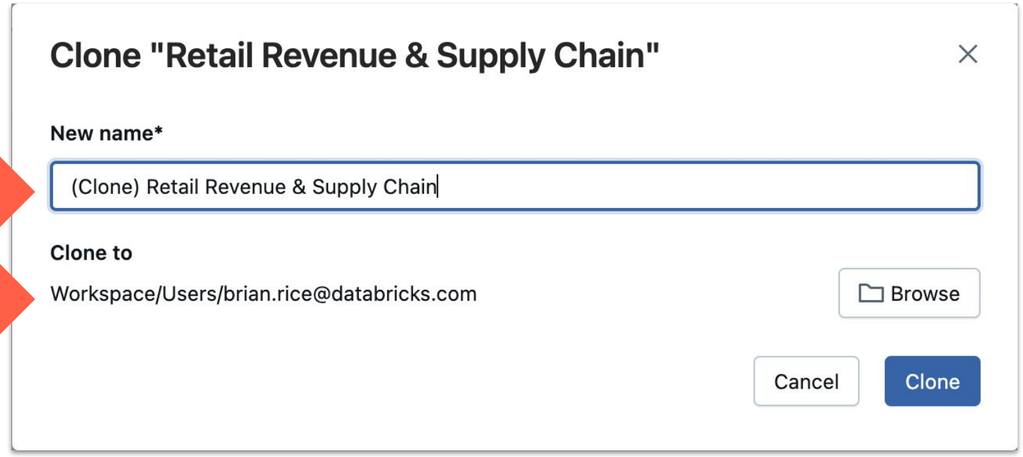
Move to draft mode



Choose Clone from the kebab menu



Specify new name and location



Pick a better name

Careful, dashboards inherit permissions

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Publishing and Sharing an AI/BI Dashboard

Managing the dashboard using Git/Version control

Initial commit

- Move the dashboard into a Git folder in the workspace
- Commit and push to the remote Git repository

Development

- Developers create Git folders on separate dev branches, typically in their home folders
- Commit changes to the development branch
- Merge development branches to main using pull requests

Deployment

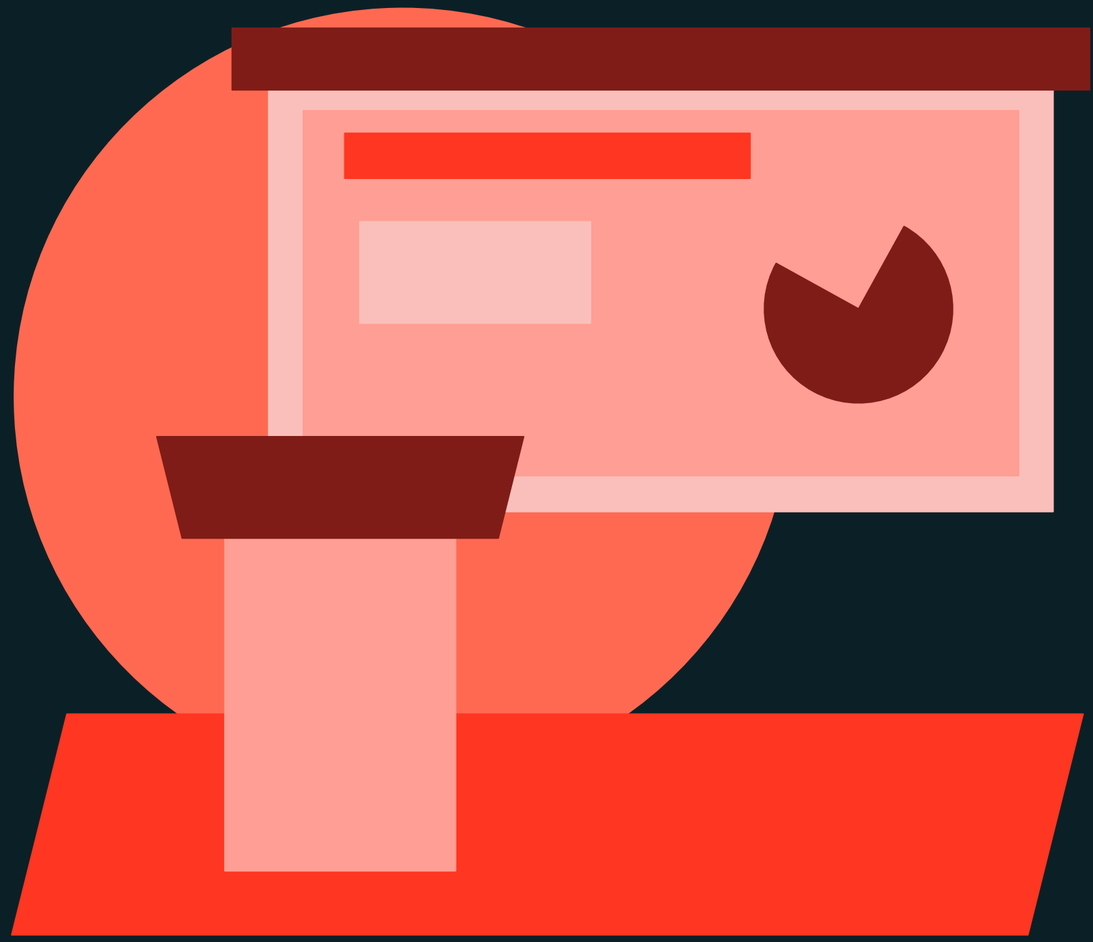
- Create a Git folder on the deployment branch in a non-user top-level folder. See CI/CD techniques with Git and Databricks Git folders (Repos)
- Pull changes into the deployment folder
- Publish dashboards from this folder
- Remove edit access and restrict updates to Git
- Share dashboards with consumers

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Dashboards and Visualizations in Databricks

LECTURE

Just enough SQL



© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Databricks SQL lets you define custom datasets

- Can filter data values to focus on subsets of the data
- Can bridge together related tables
- SQL queries are stored as part of the dashboard's infrastructure
- Are refreshed on demand and on defined schedules

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

SQL queries are especially useful for lookups

OrderID	Product	Qty	CustID
B2104	Avocado	41	8ad2750b
B2105	Grapefruit	84	451e98f5
B2106	Cabbage	8	8ad2750b
B2107	Avocado	55	bb4a23a2
B2108	Pear	50	9302b293
more...			

Transactions table

CustID	Name	Province	*more...*
451e98f5	Ted	ON	
bb4a23a2	Emma	BC	
8ad2750b	Maya	AB	
9302b293	Jo	ON	
3aa9402e	Yumiko	QC	
more...			

Customer table

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

The simplest kind of query

```
SELECT *
        FROM fruteria.sales.transactions ;
```

Catalog *Schema* *Table*

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Add a WHERE clause to focus on relevant rows

```
SELECT *
        FROM fruteria.sales.transactions
        WHERE franchiseID = "3000047" ;
```

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Add a WHERE clause to focus on relevant rows

```
SELECT *
        FROM fruteria.sales.transactions
        WHERE franchiseID IN
              ("3000047","3000022","3000093") ;
```

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Name only relevant fields

```
SELECT product, quantity
       FROM fruteria.sales.transactions
       WHERE franchiseID = "3000047" ;
```

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

But what if we want to bring together fields from more than one table? (JOINS)

- ❑ Must specify the table each desired field comes from
- ❑ Must tell the query how to tie the tables together

OrderID	Product	Qty	CustomerID
B2104	Avocado	41	**8ad2750b**
B2105	Grapefruit	84	**451e98f5**
B2106	Cabbage	8	8ad2750b
B2107	Avocado	55	bb4a23a2
B2108	Pear	50	**9302b293**
more...			

Transactions table

CustomerID	Name	Province	*more...*
451e98f5	Ted	ON	
bb4a23a2	Emma	BC	
8ad2750b	Maya	AB	
9302b293	Jo	ON	
3aa9402e	Yumiko	QC	
more...			

Customer table

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

First, let's name the two tables…

```
SELECT product, quantity
       FROM fruteria.sales.transactions
            AS t
       JOIN fruteria.sales.customers
            AS c
     [...] ;
```

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Next let's specify the linking condition…

```
SELECT product, quantity
       FROM fruteria.sales.transactions
            AS t
       JOIN fruteria.sales.customers
             AS c
       ON t.customerID = c.customerID ;
```

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Now we can use fields from both tables

```
SELECT t.product, t.quantity, c.province
       FROM fruteria.sales.transactions
            AS t
       JOIN fruteria.sales.customers
             AS c
       ON t.customerID = c.customerID ;
```

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

And we can further filter

```
SELECT t.product, t.quantity, c.province
       FROM fruteria.sales.transactions
            AS t
       JOIN fruteria.sales.customers
             AS c
       ON t.customerID = c.customerID
       WHERE c.province IN ("ON", "BC") ;
```

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

And we can further filter

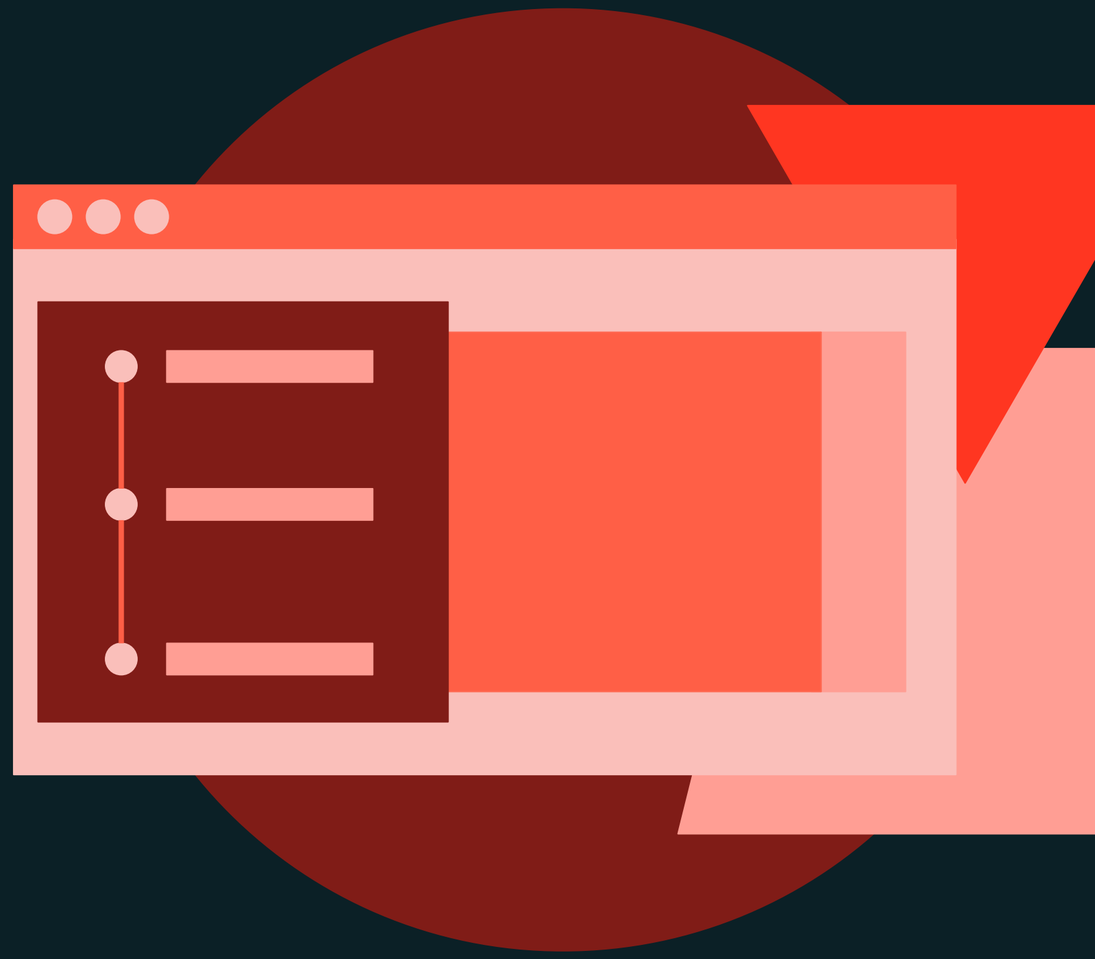
```
SELECT t.product, t.quantity, c.province
       FROM fruteria.sales.transactions
            AS t
       JOIN fruteria.sales.customers
             AS c
       ON t.customerID = c.customerID
       WHERE c.province IN ("ON", "BC")
                 AND
                t.product = "Grapefruit" ;
```

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Dashboards and Visualizations in Databricks

DEMONSTRATION

Designing Datasets for Dashboards



© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

What’s in this demonstration?

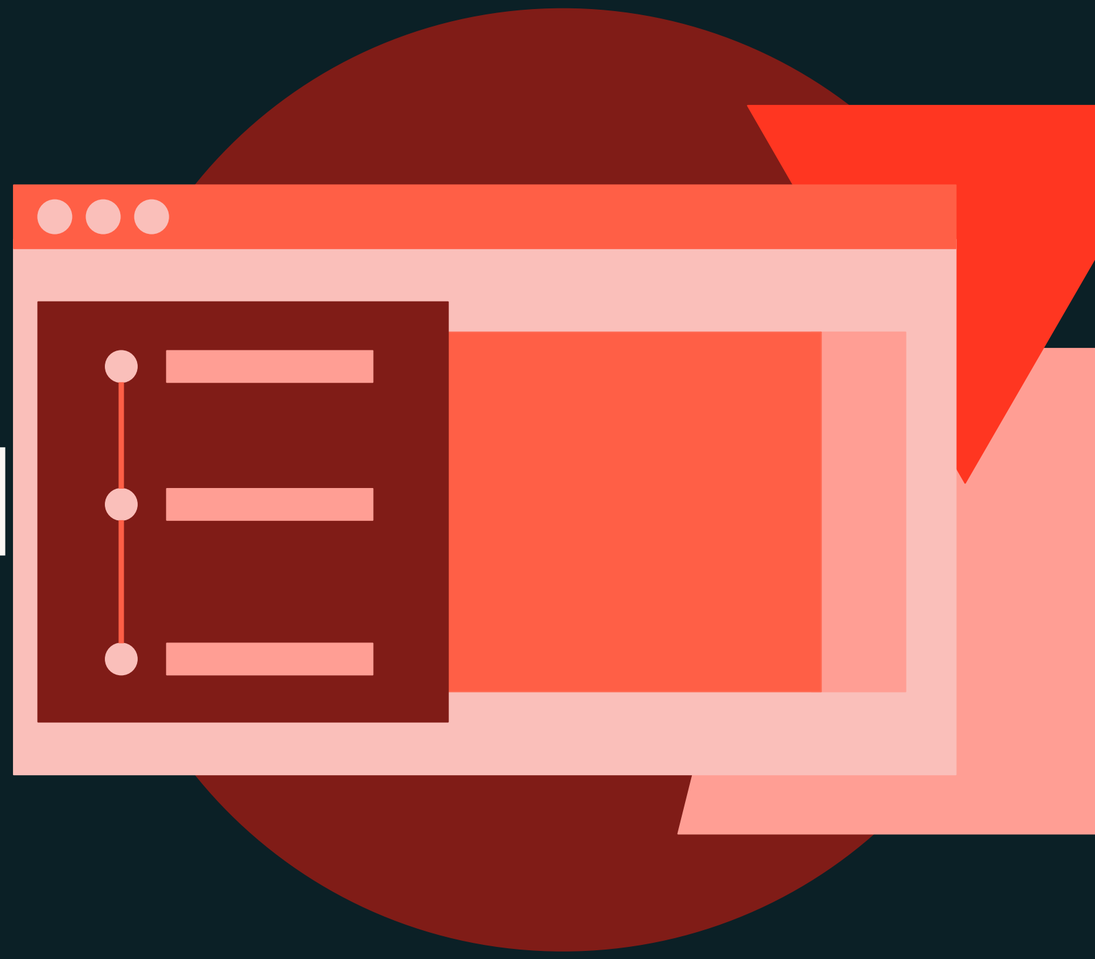
In this lesson, we’ll learn about creating datasets specifically for AI/BI Dashboards and how to associate a dashboard to these given assets.

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Dashboards and Visualizations in Databricks

DEMONSTRATION

Creating Visualizations and adding Summary Statistics to Dashboards



© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

What’s in this demonstration?

In this lesson, you’ll learn about the widgets that can be added to dashboards. You’ll learn how to add them to dashboards and configure them to display appropriate summary statistics and details.

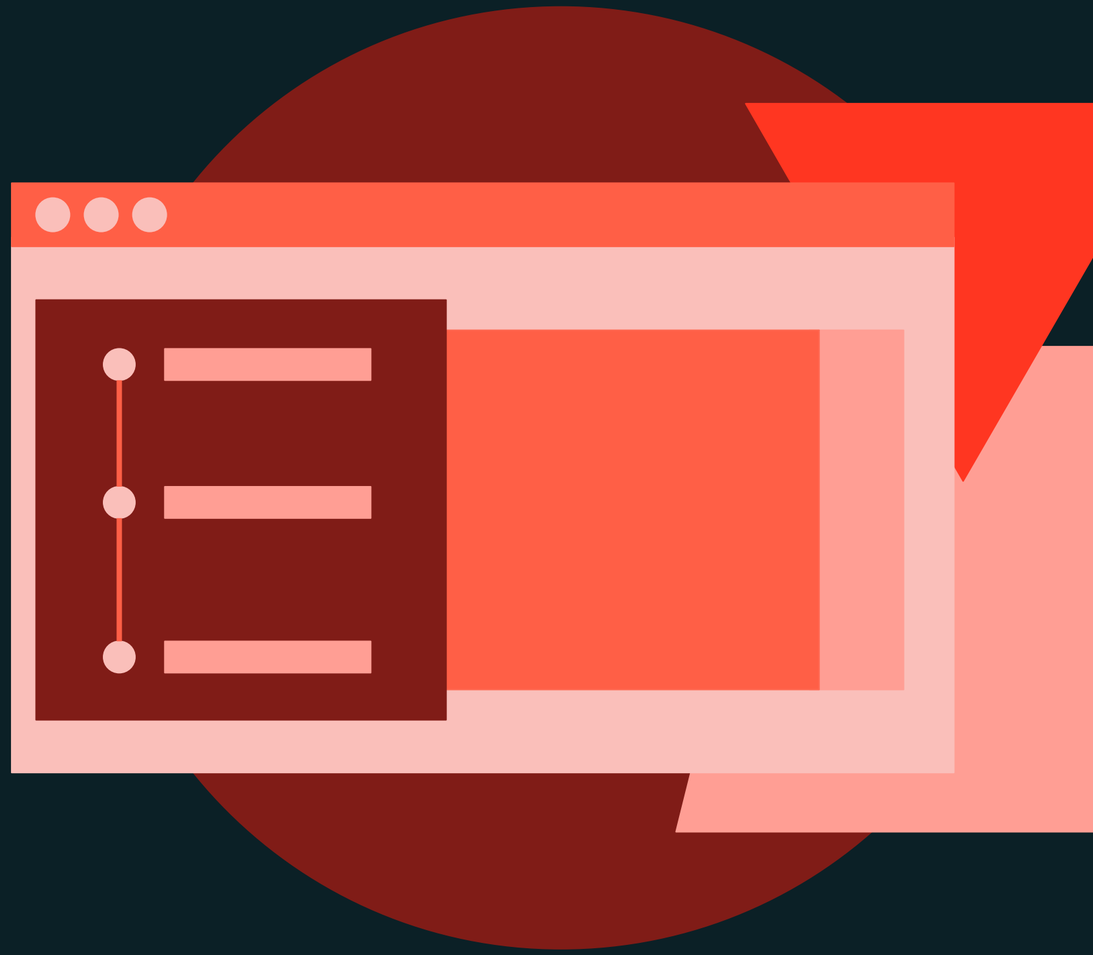
Complete *Designing Datasets for Dashboards* before beginning this demonstration.

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Dashboards and Visualizations in Databricks

DEMONSTRATION

AI Enhanced Features



© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

What’s in this demonstration?

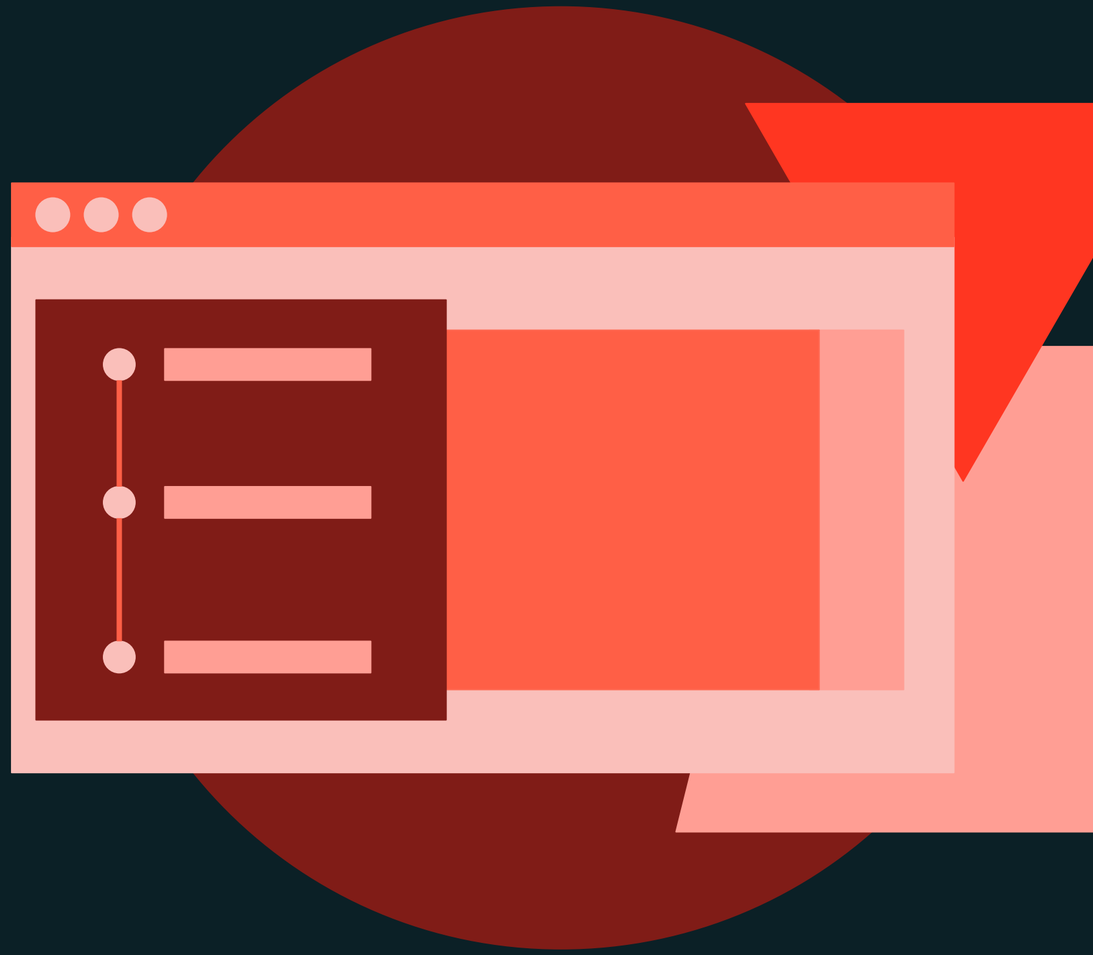
In this lesson you’ll learn how to use Databricks’s AI features to create visualizations based on natural language inputs.

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Dashboards and Visualizations in Databricks

DEMONSTRATION

Filters



© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

What’s in this demonstration?

In this lesson you’ll learn how to add dynamic features to dashboards including filters. You’ll also learn how to utilize cross filtering to filter multiple visualizations at the same time by simply clicking on a visualization.

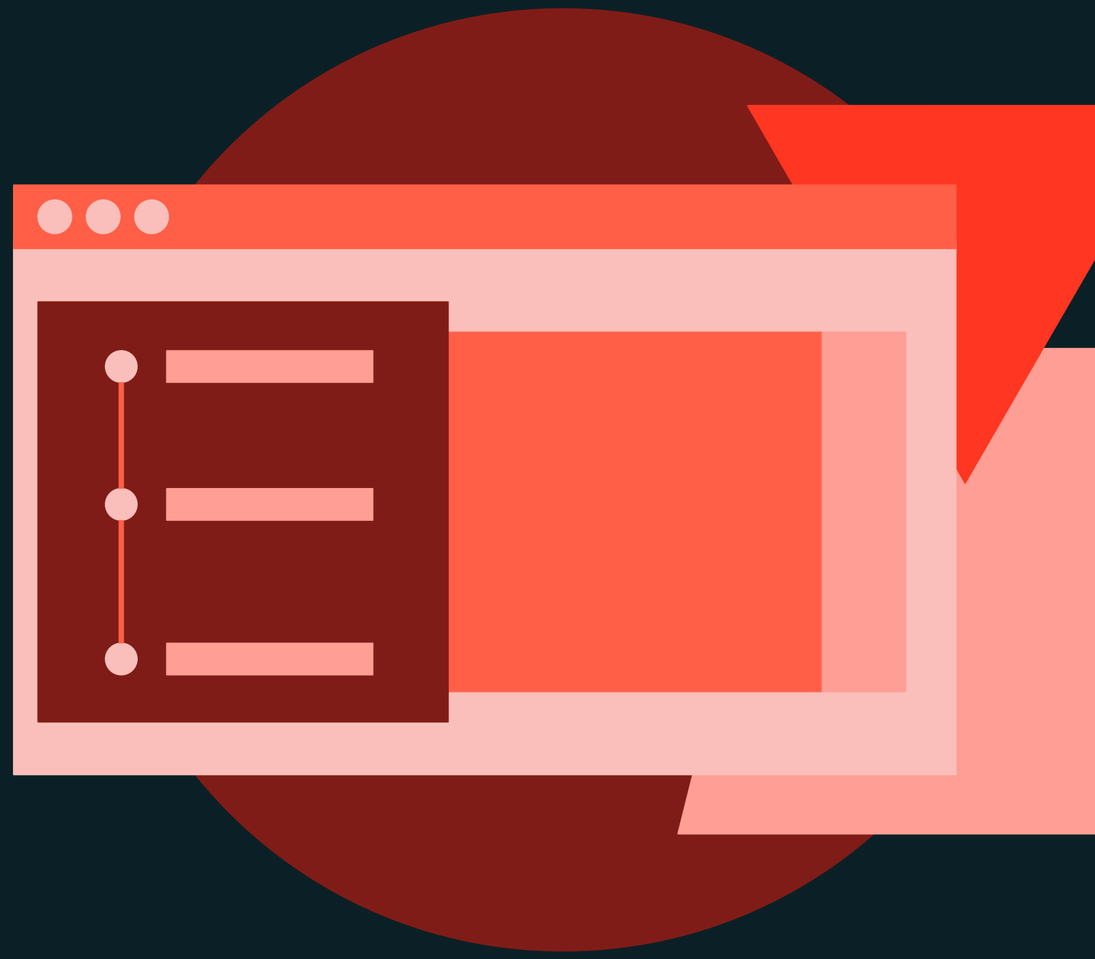
Complete *Creating Visualizations and adding Summary Statistics to Dashboards* before beginning this demonstration.

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Dashboards and Visualizations in Databricks

DEMONSTRATION

Sharing Dashboards with Stakeholders and Others



© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

What’s in this demonstration?

In this lesson you’ll learn how to securely share and publish dashboards. You’ll take a look at the permissions settings for dashboards to ensure all the appropriate individuals have access to the right assets for viewing the dashboard.

Complete *Filters* before beginning this demonstration.

Dashboards and Visualizations in Databricks

LAB EXERCISE

Dashboard and Visualization Lab Activity

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

What’s in this lab activity?

- Add Datasets to a Dashboard
- Add several visualizations to a dashboard.
- Add multiple tabs to a dashboard
- Add additional (non-visualization) widgets to a dashboard.
- Add filters to a dashboard.
- Establish Refresh schedules.
- Share Dashboards securely.

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

AI/BI Genie

AI/BI for Data Analysts

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Agenda

AI/BI Genie	Time	Lecture	Demo	Activity
AI/BI Genie	10 mins	✓		
Developing Genie Spaces	15 mins		✓	
Sharing Genie Spaces	5 mins		✓	
Maintaining Genie Spaces	10 mins		✓	
AI/BI Genie Development Activity Lab	30 mins			✓

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Learning Objectives

Create data assets for self-service analytics.

- Establish AI/BI Genie spaces associated with a dashboard.
- Establish stand-alone AI/BI Genie spaces.
- Share AI/BI Genie spaces with stakeholders.
- Solicit feedback from stakeholders and non-technical users.

Manage the data assets for business intelligence in Databricks.

- Make edits to the settings of an AI/BI Genie Space.
- Review and respond to feedback on AI/BI Genie Spaces from stakeholders and business users.

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

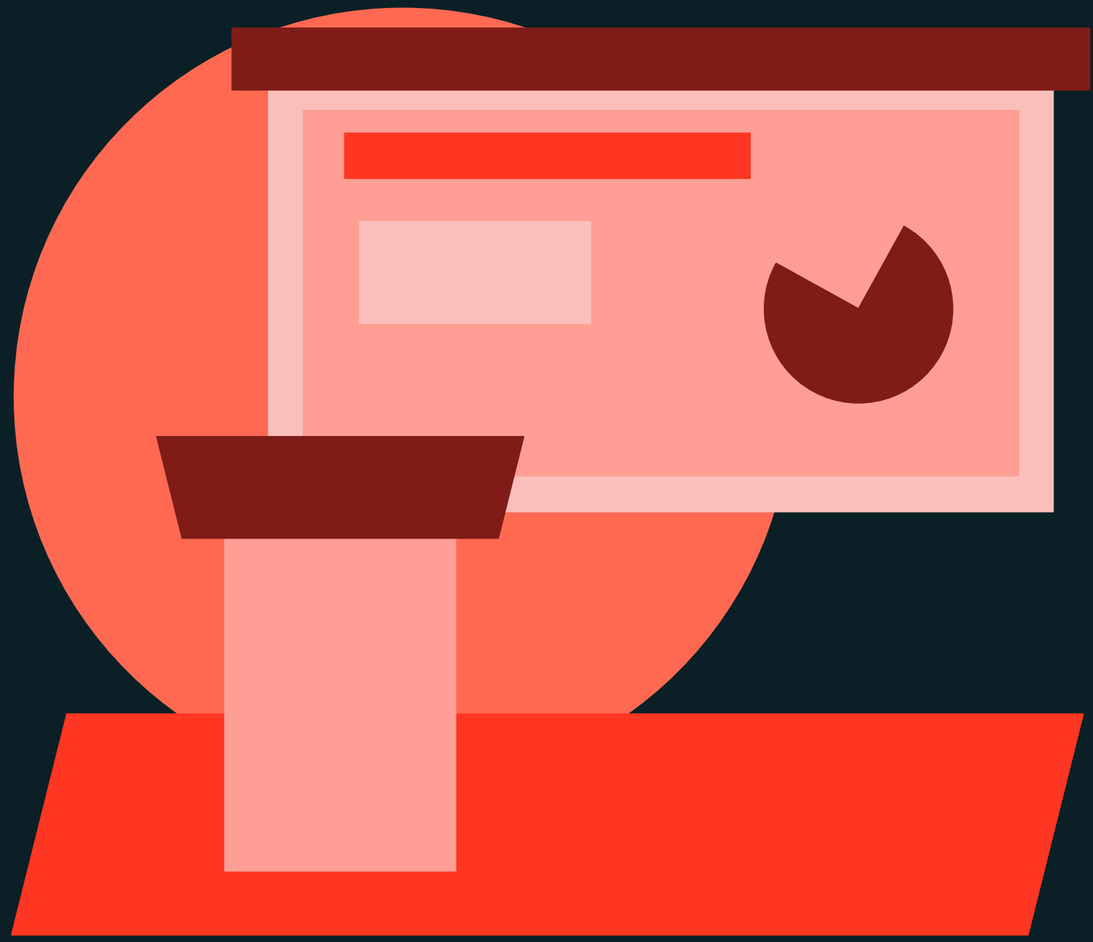
AI/BI Genie

LECTURE

AI/BI Genie



© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Genie lets users converse with data in natural language

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

How does Genie use AI?

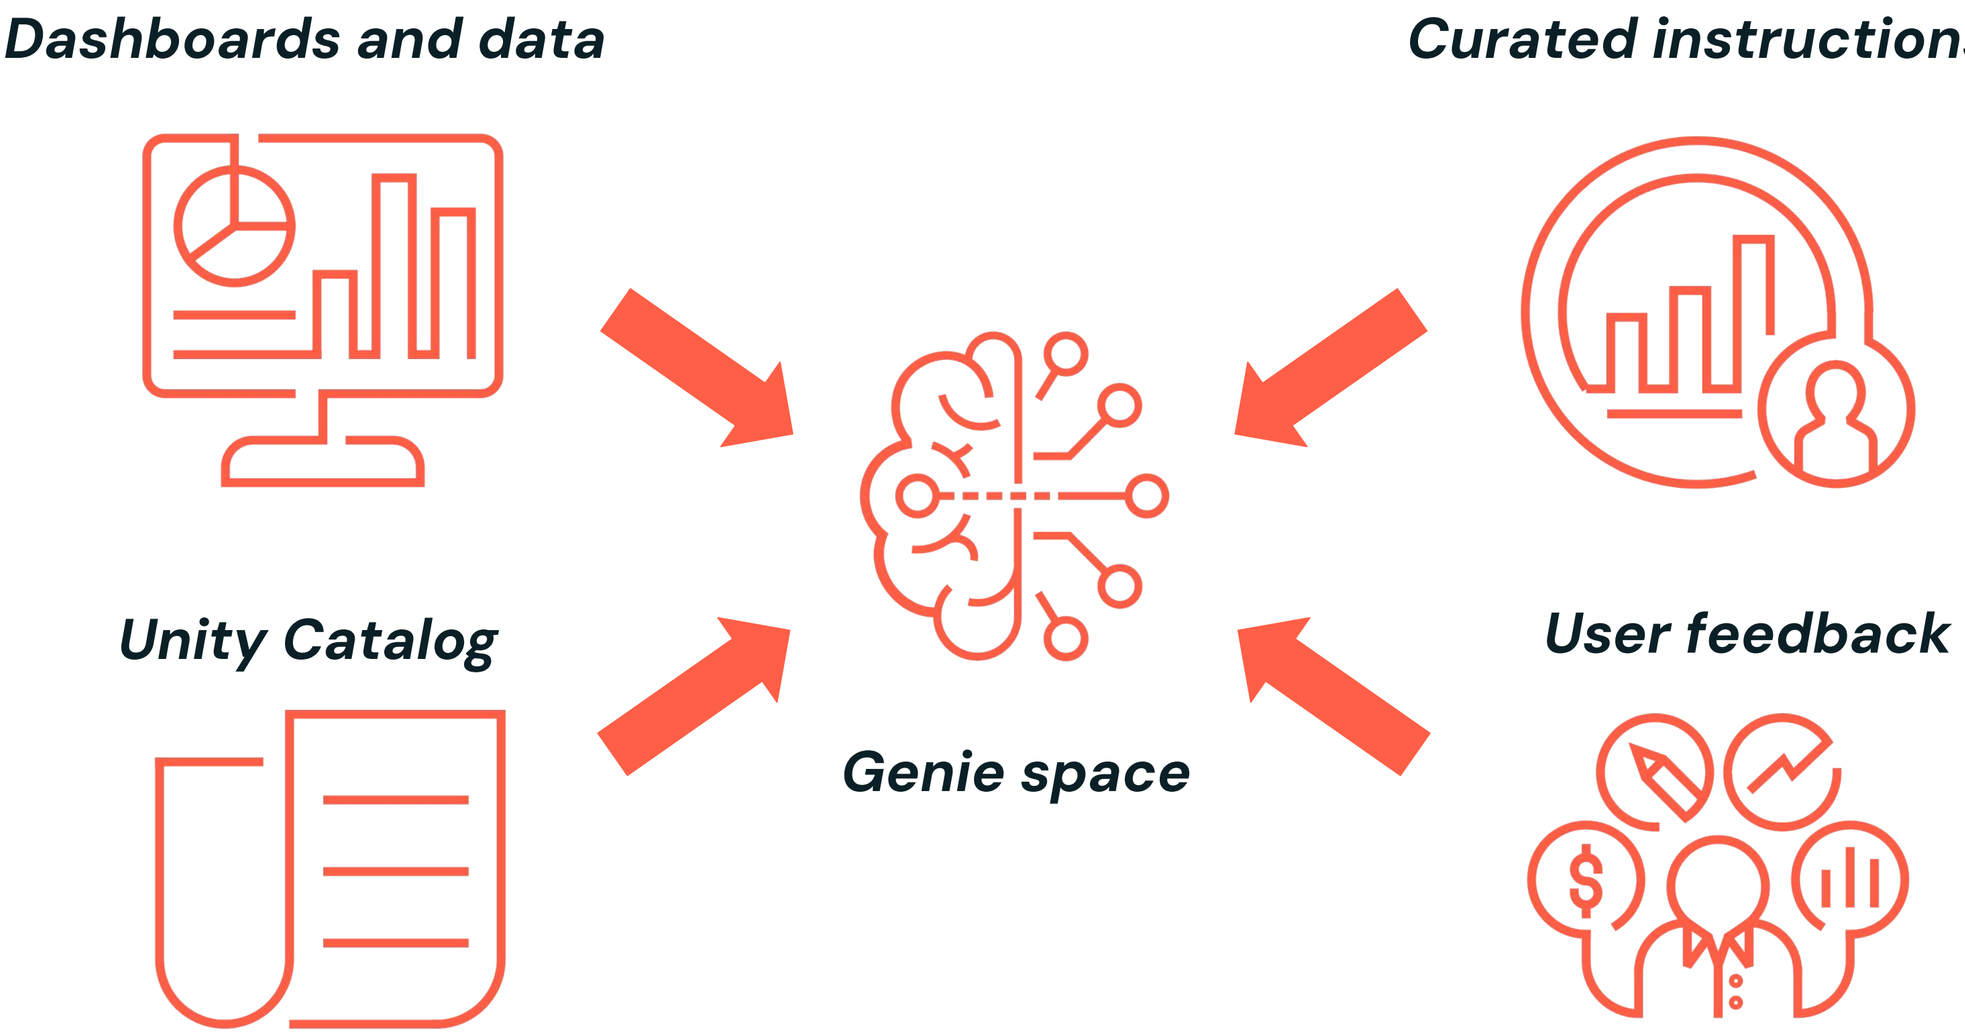
HUMAN NATURAL LANGUAGE ENTRY

Chat responses

```
SELECT name, national_id,
       country, fee_paid
FROM fee_transactions
WHERE country IN
       ('US','CA','MX');
```

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

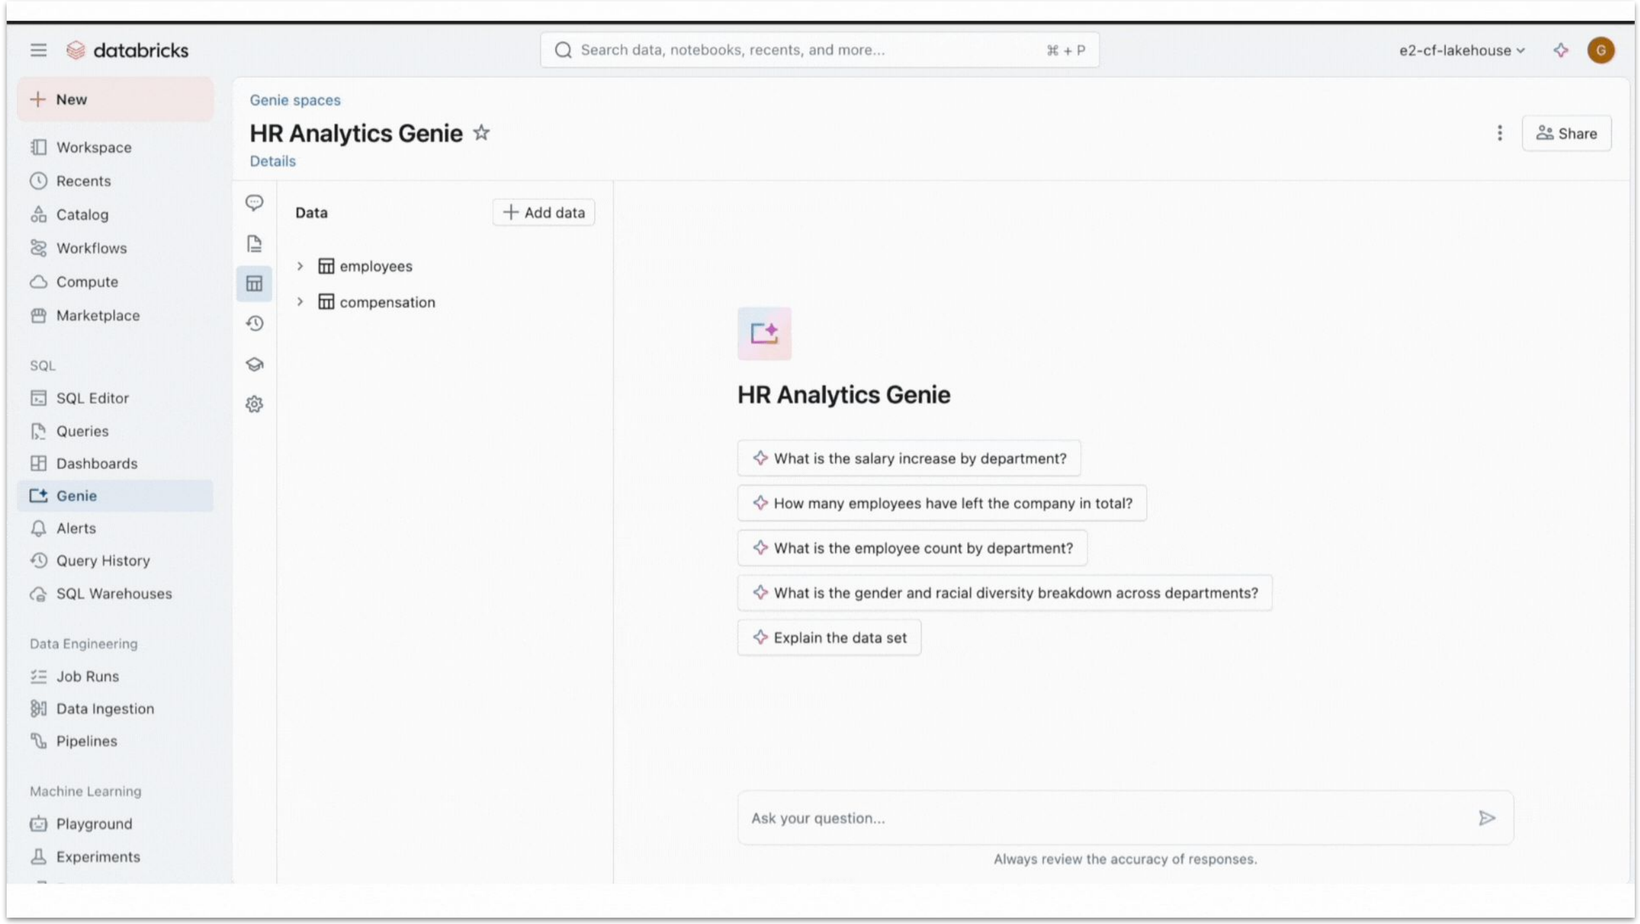
How AI/BI Genie understands the business



© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Building your Genie Space

Start with well-documented tables



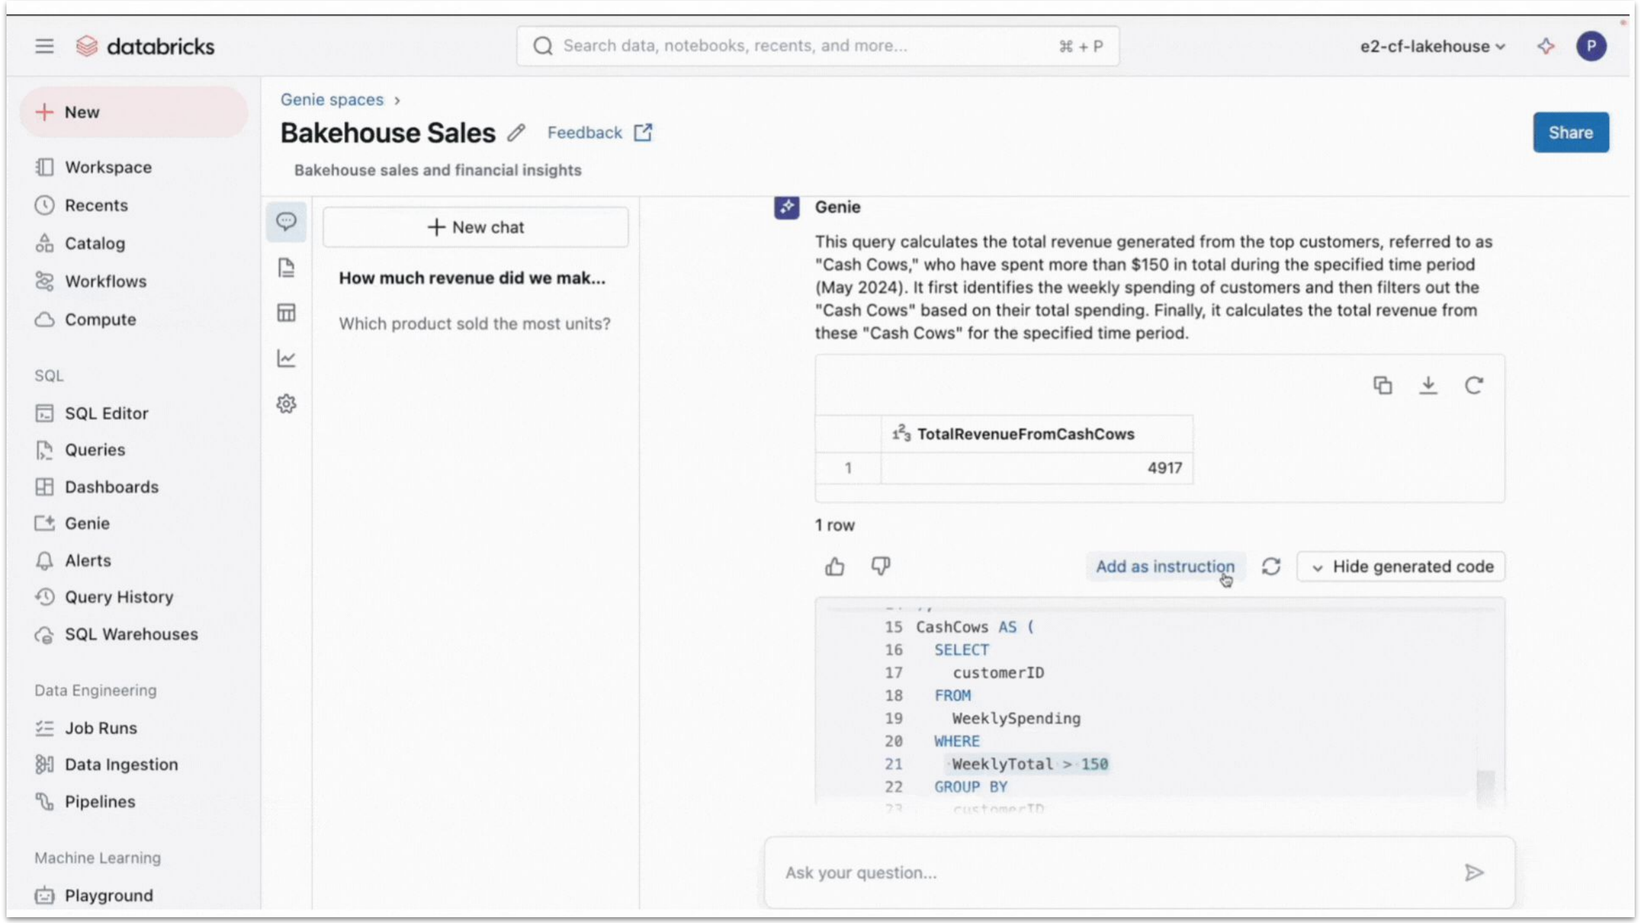
- Begin with UC tables/views and add meaningful comments to columns and table descriptions for clarity
- Clearly define primary keys and foreign keys for better context understanding

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Building your Genie Space

Genie learns from you

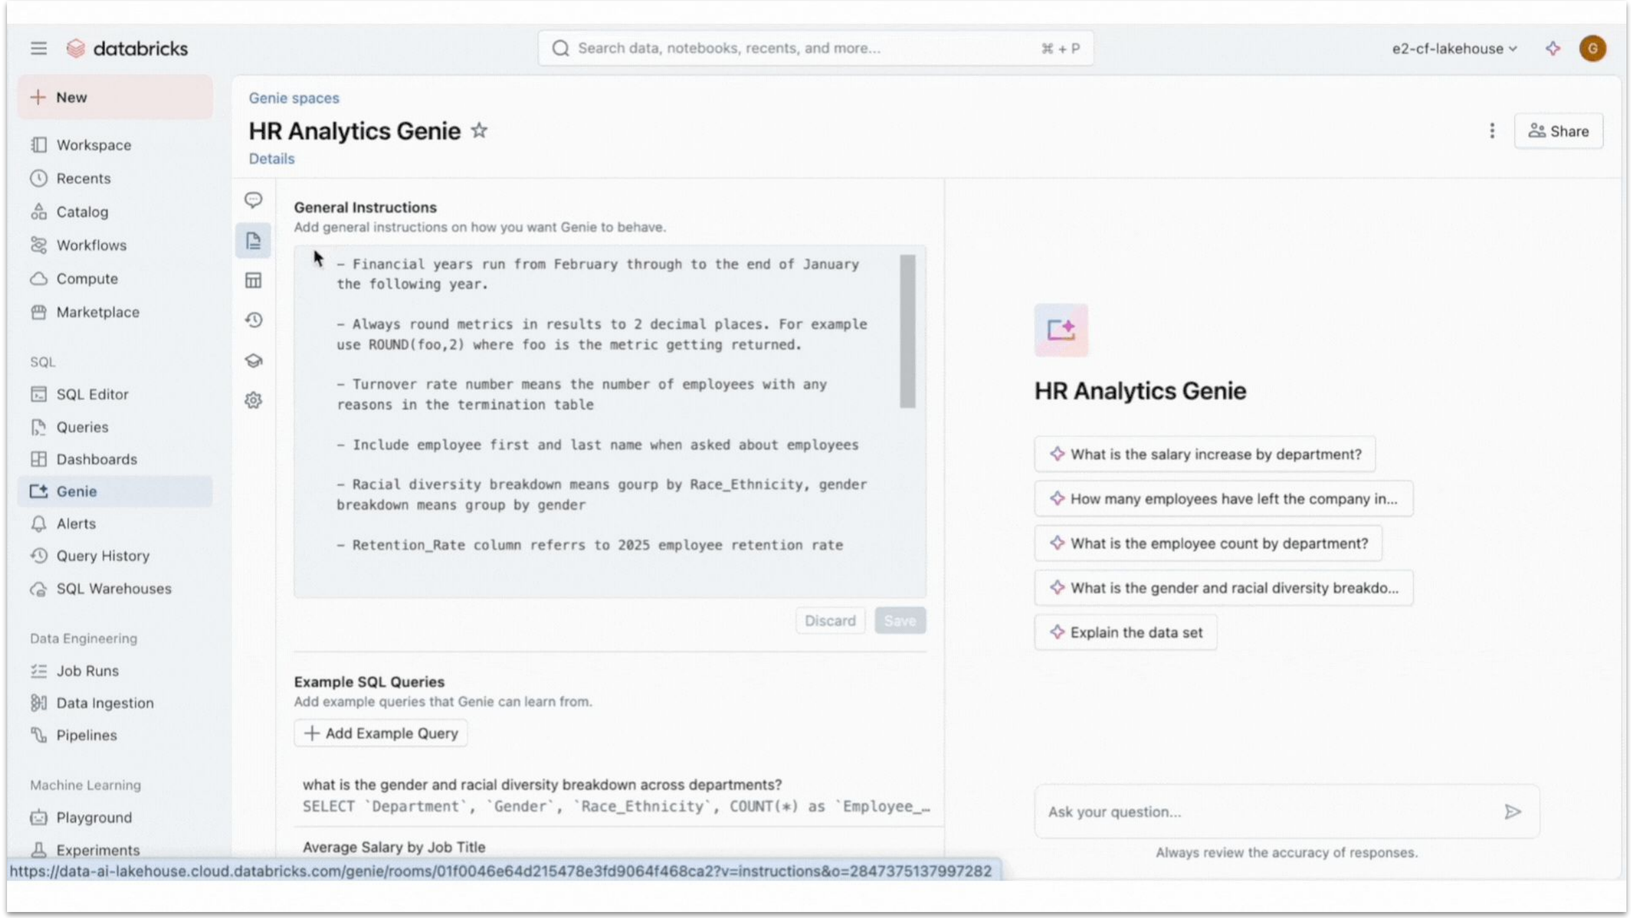
- Include relevant instructions that help Genie understand unique jargon, logic or business concepts
- Save as instruction → verified SQL queries can be saved, teaching Genie to provide more accurate answers in the future



© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Building your Genie Space

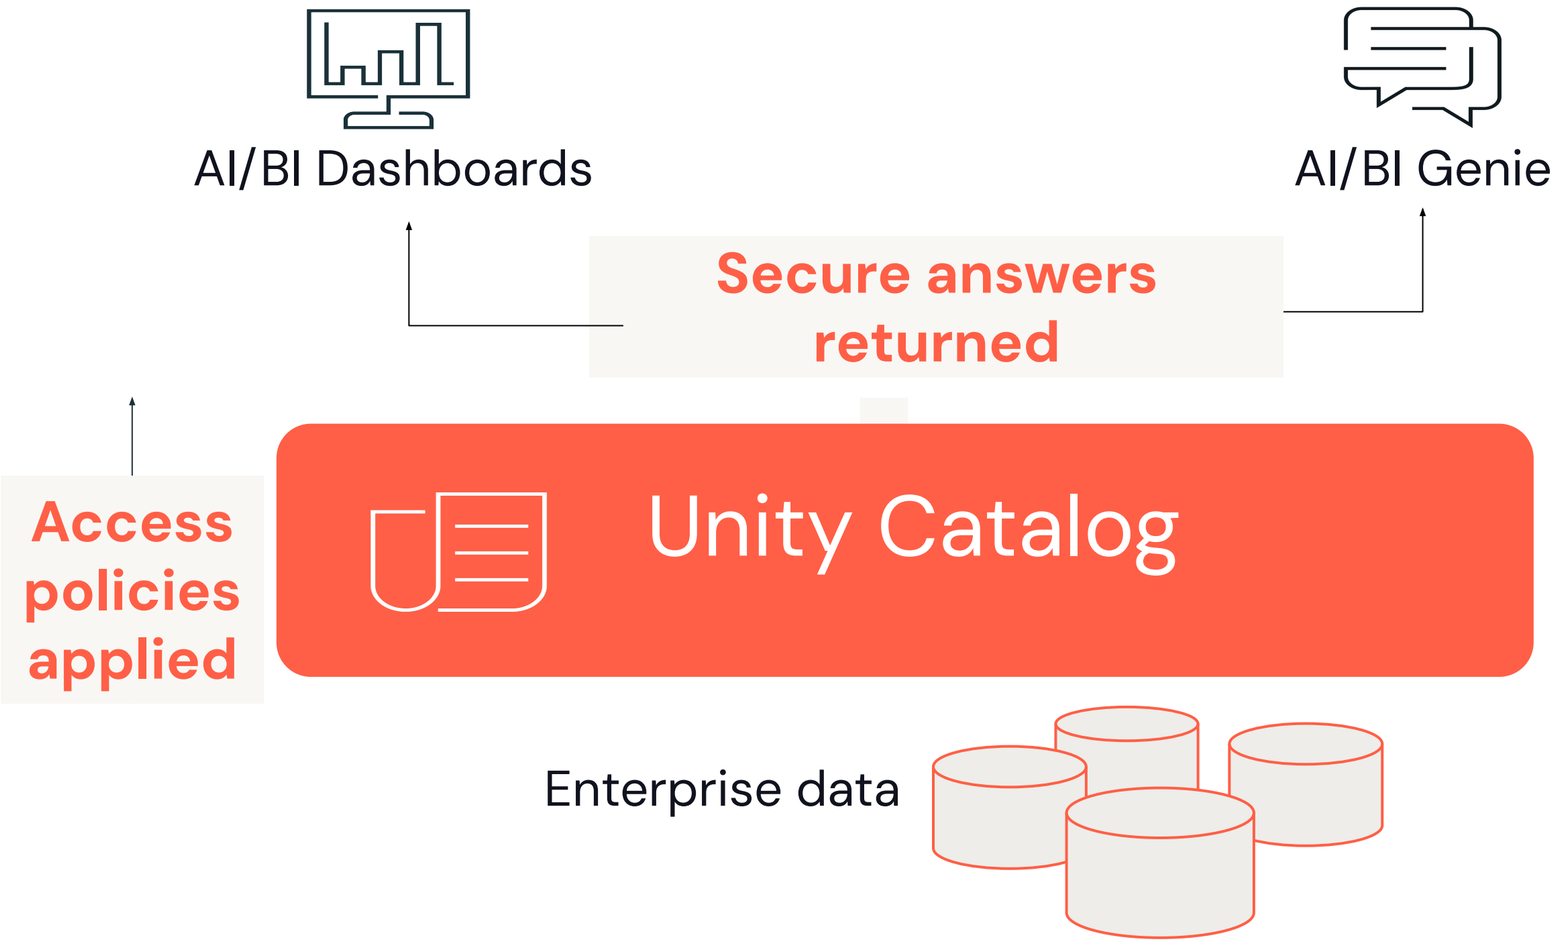
Genie provides contextual and accurate responses



- **Genie uses trusted assets like:**
  - Example SQL queries which directly teaches the model how to answer specific questions
  - SQL functions: custom functions can be registered in UC and used to answer questions in the Genie space

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Genie offers governed and secure insights



© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

What are your responsibilities for using AI/BI Genie with stakeholders and business users?

- ❑ Carefully curate the base data sets
- ❑ Provide reasonable sample queries
- ❑ Mark vetted queries as Trusted Assets
- ❑ Respond to user feedback and add instructions
- ❑ Ensure that data is fresh

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Permissions: what can you do with a Genie space?

CAN VIEW or **CAN RUN**		✓ Can ask Genie questions and get answers ✓ Can give feedback on answers 👍 👎
CAN EDIT		All the above, plus ✓ Can add or edit saved instructions ✓ Can add or edit sample questions ✓ Can bring in or throw out included data tables
CAN MANAGE		All the above, plus ✓ Can see all the questions users ask in the space, and the answers ✓ Can see all the feedback ✓ Can change the space's permissions ✓ Can delete the space

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Governing your Genie Space

Governed Genie space interactions

Unified security and governance

All interactions governed by UC's security policies and data access controls

RLS and CLS ensure data privacy

Trusted interactions

All Genie interactions inherit access policies

Users only see data they are authorized to access

Prepping for governance

Users must have:

SELECT permissions on UC tables, views, functions, etc.

CAN USE permissions on the SQL warehouse

Consider using a code-styled callout box for these permissions to make them pop

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

A few best practices when creating a Genie space

- What should users be able to answer?
- Encourage alignment with business needs
- Test the response quality
- Rephrase the questions; does the model still understand?
- Ask new, related questions; does Genie generalize well?
- Refine your instructions
- Iterate on prompts until answers match expectations
- Encourage fine-tuning based on user testing

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

AI/BI Genie

DEMONSTRATION

Developing Genie Spaces

Summary and Next Steps

AI/BI for Data Analysts

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Course Learning Objectives Recap

In this course, you learned how to use Databricks AI/BI tools to:

- Design dashboards for business insights.
- Share business intelligence assets with collaborators and stakeholders.
- Periodically revise data assets in accordance with best practices and new information.
- Create data assets for self-service analytics.
- Manage the data assets for business intelligence in Databricks.

© Databricks 2025. All rights reserved. Apache, Apache Spark, Spark, the Spark Logo, Apache Iceberg, Iceberg, and the Apache Iceberg logo are trademarks of the Apache Software Foundation.

Earn a Databricks certification!

Certification helps you gain industry recognition, competitive differentiation, greater productivity, and results.

- This course helps you prepare for the Databricks **Certified Data Analyst Associate exam**
- Recommended Self-Paced Courses
